

2013 Unsheltered Point-in-Time Form Instructions

1. Complete planning group name, location, and contact information. Please list all the counties that the individuals were counted in. **One form for each planning group should be submitted.**
2. Enter in the total number of individuals and households by type counted that are unsheltered the night of the count and the sub-population data. (Note: Number of youth only households and individuals refers to children under age of 18 that enter shelter unaccompanied by adults. This is a rarity in the balance of state).

For definitions on subpopulations types (especially chronically homeless individual and family), please refer to page 23 at <http://www.hudhre.info/documents/2013HICandPITGuidance.pdf>

3. Briefly describe the methodology of how the count was performed and who assisted with counting individuals.
