

Regional Entrepreneurial Assessment Project:

Final Briefing Report

Region 5: Hampton Roads

December 2018

Table of Contents

- I. Project Overview
- II. Project Key Steps
- III. Framework for Assessment
- IV. Situational Assessment
- V. Identification of Potential Priority Actions

Appendices:

- Appendix A: Listing of Working Group Members
- Appendix B: Data Trends on Entrepreneurial Development
- Appendix C: Regional Asset Inventory
- Appendix D: Competitive Benchmarking
- Appendix E: Benchmark Case Study Profiles

Overview

The purpose of this briefing report is to provide a high-level baseline assessment of entrepreneurial development and identification of potential priority actions in GO Virginia Region 5 – the Hampton Roads Region.

TEconomy Partners, LLC was engaged by the GO Virginia Statewide Board to provide each GO Virginia region an independent and objective assessment of its entrepreneurial development position, to facilitate a situational assessment of the region's entrepreneurial ecosystem, and to help identify with local leaders priority actions to help strengthen the ecosystem.

Setting the Context: Importance of Entrepreneurial Development for Regional Growth

- In 2017, there were 4,247 surviving traded sector startups formed since 2007 in Region 5
- 24,976 jobs in 2017 were found in these 4,247 surviving startups
- By comparison, over the 2007-2017 period, total traded sector industry employment declined by 8,138 jobs in Region 5.
- So, without entrepreneurial growth, the Hampton Roads Region would have experienced an even greater decline in its traded sector industry employment.

Project Work Plan

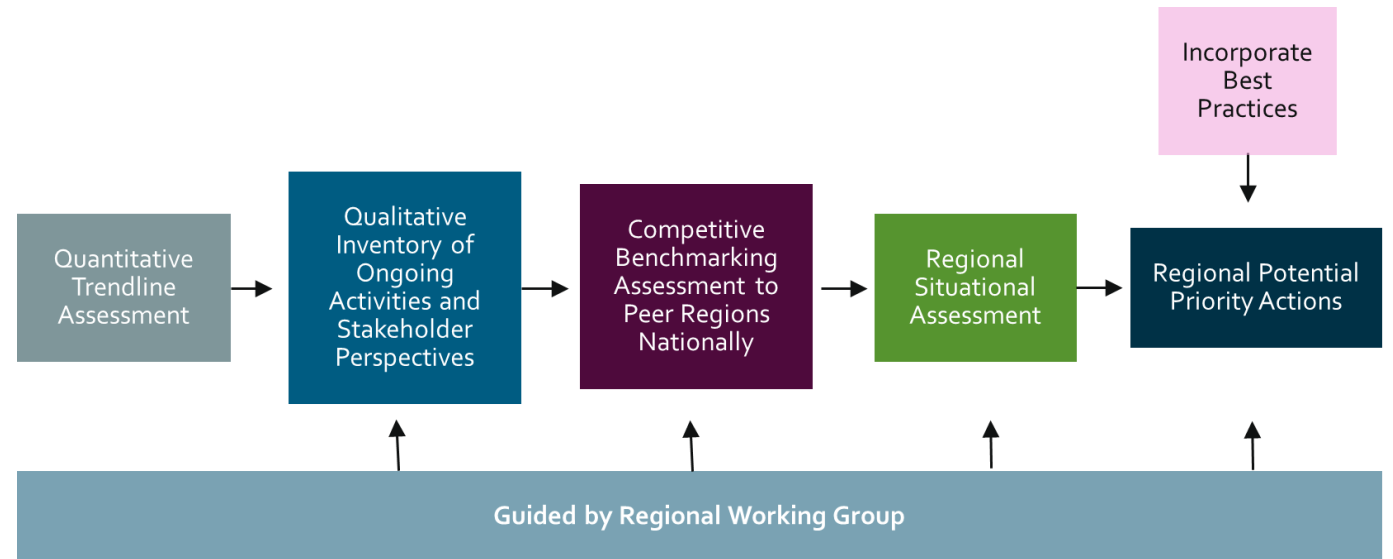

The work plan for preparing this Region 5 entrepreneurial development assessment involved examining:

- Recent data trends in entrepreneurial development
- Ongoing entrepreneurial activities and stakeholder perspectives
- Competitive position to peer regions nationally

These analyses were then utilized to develop a situational assessment of gaps and weaknesses to address and strengths and opportunities to build upon.

Based on the situational assessment and informed by best practices nationally, a set of potential priority actions has been identified for further development by GO Virginia Region 5 to catalyze the development of a robust innovation ecosystem.

Overview of Work Plan for GO Virginia's project:

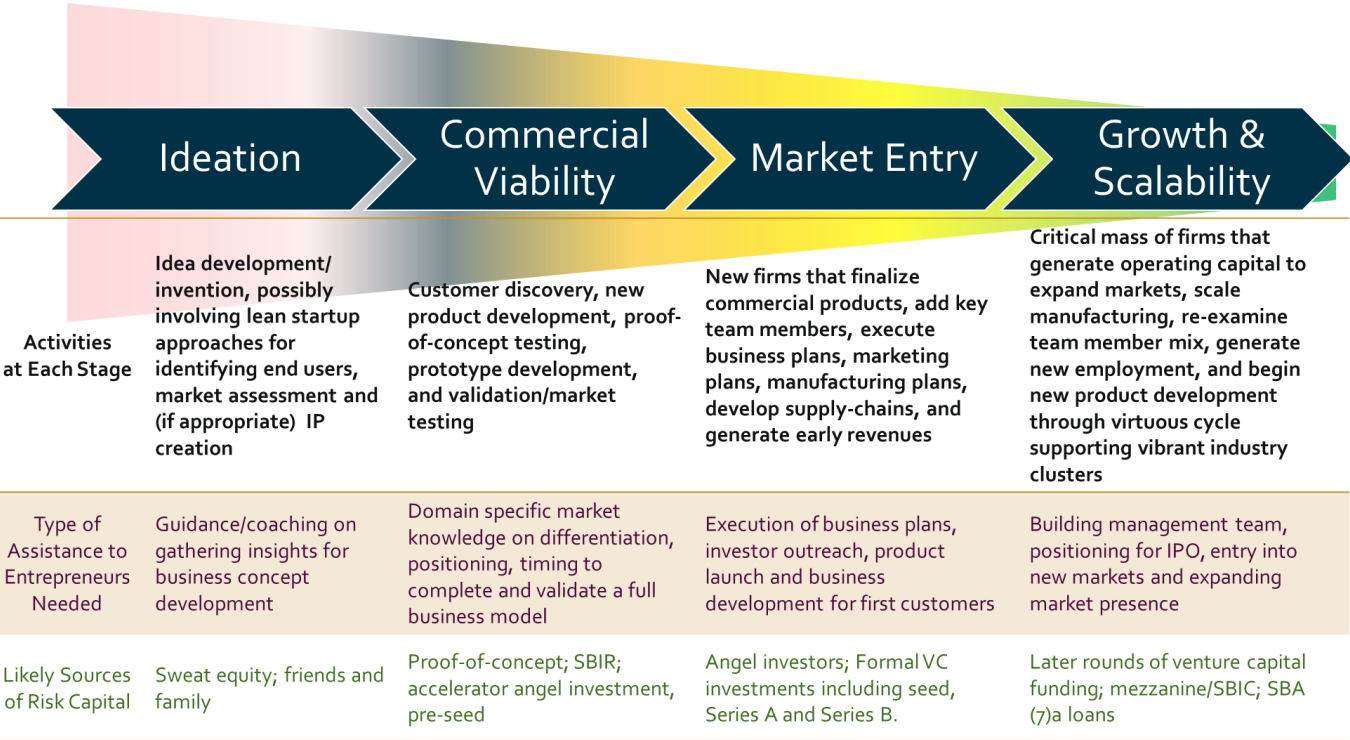

See Appendix A for listing of Working Group members from Region 5

Strategic Framework: Focus on Entrepreneurial Development Stages Across Traded Sector Industries

Stages of Entrepreneurial Development

Entrepreneurship is a process involving an interconnected set of development stages supported by public and private resources and services that generates successful new startup businesses to drive regional economic growth. If a region is underperforming in any stage of entrepreneurial development, then it will not realize its full potential in advanced industry development.

Focus on Entrepreneurial Development in Traded Sector Industries

Of particular importance to GO Virginia is focusing on those new start-ups in traded sector industry activities that serve customers and markets beyond their local communities, and as a result, can drive regional economic growth. It includes industries such as: manufacturing; professional, scientific and technical services; information technology; finance and insurance; transportation and warehousing; mining; and agriculture and food processing industries.

US Cluster Mapping Project describes the critical importance of a strong base of traded industry sectors :

“[Traded industry clusters] are free to choose their location of operation (unless the location of natural resources drives where they can be) and are highly concentrated in a few regions, tending to only appear in regions that afford specific competitive advantages.

Since traded clusters compete in cross-regional markets, they are exposed to competition from other regions...Traded clusters are the "engines" of regional economies; without strong traded clusters it is virtually impossible for a region to reach high levels of overall economic performance.”

Assessment of Ideation in Region 5

Overall Assessment:

Mixed results to date, but significant opportunities for advancing new program activities.

Strengths and Opportunities:

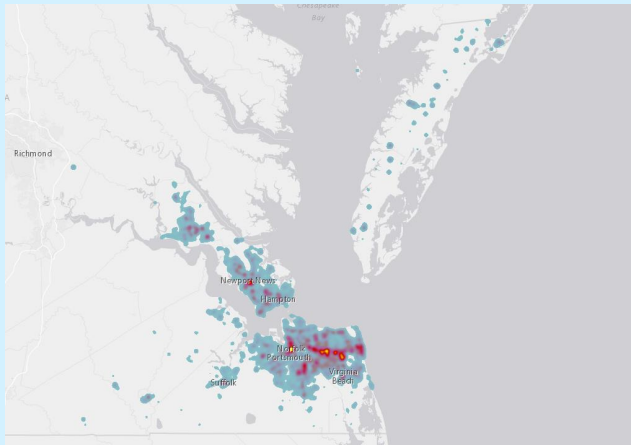

- **Competitive in overall levels of business formation** with peer regions through 2014 (most recent data available nationally),
- **Geographic footprint of traded sector startups concentrated in Virginia Beach, Norfolk and Chesapeake**— with over 60% of the startups and jobs-from startups occurring in these three sub-regions, but there is activity throughout the entire region.
- **Diversity in startup activities across traded sector industry clusters**, although not directly related to Region 5’s 2017 Growth and Diversification Plan. Need to modify cluster focus in light of what the more recent data reveals to align with emerging opportunities.
- **A growing focus on supporting the entrepreneurial ecosystem within the Region** through the efforts of organizations such as 757 Accelerate, 757 Angels, StartWheel, and numerous co-working and maker-spaces, as well as the effort of the universities and ICAP through the leadership of ODU

Gaps and Weaknesses:

- **Volatility in business startups from year-to-year**, with a range from 847 startups (2017) to 1,236 startups (2013) in just the past five years.
- **University R&D has been declining since 2010**
- **Region lags the nation in technology transfer and commercialization efforts**

Region 5 has a diverse base of startups across traded sector industry clusters as well as across areas of the region

Major Industry Cluster*** (those relating to regional priority clusters bold faced)	Number of Start-ups Since 2007 Surviving by 2017	Start-up Employment Levels, 2017
Agriculture & Food Processing	218	1,059
Business Services	2,385	10,636
Energy, Natural Resources, & Finished Products	108	1,114
Engineering, R&D, Testing & Technical Services	244	2,516
Financial & Insurance Services	541	2,060
Health Care Services	148	5,853
Information Technology & Communications Services	234	1,697
Life Sciences	134	955
Manufacturing	204	1,536
Ship Building, Aerospace, & Defense	30	528
Transportation, Distribution and Logistics	800	5,467

Assessment of Commercial Viability in Region 5

Overall Assessment:

Opportunity to better position base of innovative companies found in region for success in commercializing products.

Strengths and Opportunities:

- Significant efforts have been added to the “toolbox” for supporting technology commercialization targeted to emerging companies across the region, although it will be critical to sustain funding.
 - 757 Accelerate is becoming more established and 757 Seed was created
 - ODU’s Institute for Innovation & Entrepreneurship (IIE) is developing and coordinating a number of efforts to increase the level of entrepreneurial interest and engagement, including ICAP
 - StartWheel connects entrepreneurs to resources in Hampton Roads.

Gaps and Weaknesses:

- **Research commercialization efforts are hindered** by insufficient levels of proof-of-concept funding and connection to mentorship networks, including serial entrepreneurs, SMEs, and others with significant business acumen.
- **Very limited level of SBIR awards granted to companies within the region**, with numerous years recording single digit awards.
- **University technology transfer underperforming** in key metrics of disclosures and startups, normalized by size of research base.
- **Not enough pre-seed, proof-of-concept funding** (earliest stages of funds). 757 Seed is starting, but dollars will not be sufficient for deal flow.

Region’s Efforts in Increasing Commercial Viability

757 Accelerate - Non-profit mentor-driven startup acceleration program connecting founders with mentors, investors, support services, working space, and lean startup education to move from idea to high-growth venture in 3 months. Provides each startup with \$20K in equity-free financing.

757 Seed - a small seed fund that provides equity investments to entrepreneurs and early-stage businesses. Fund is backed by a coalition of regional partners, including 10 core partners.

StartWheel - Centralizes efforts that foster growth of entrepreneurialism in regional innovation economy by connecting talent, resources, information, and leadership in Hampton Roads. Primarily a digital/web platform featuring regional resource directory, interconnected events calendar, and media content covering local ecosystem news and stories. Co-organizes bi-monthly 757 Pitch events and major annual event celebrating regional entrepreneurship.

ODU’s Institute for Innovation & Entrepreneurship (IIE) is developing and coordinating a number of efforts to increase the level of entrepreneurial interest and engagement including the **Innovation Commercialization Assistance Program (ICAP)**, which works with selected businesses to help determine their customer bases and fine-tune their business models.

Assessment of Market Entry in Region 5

Overall Assessment:

Significant uptick in activity in recent years, led by regional private investors, but danger of leaving companies on the “run-way” or losing them out of region if additional support can not be developed.

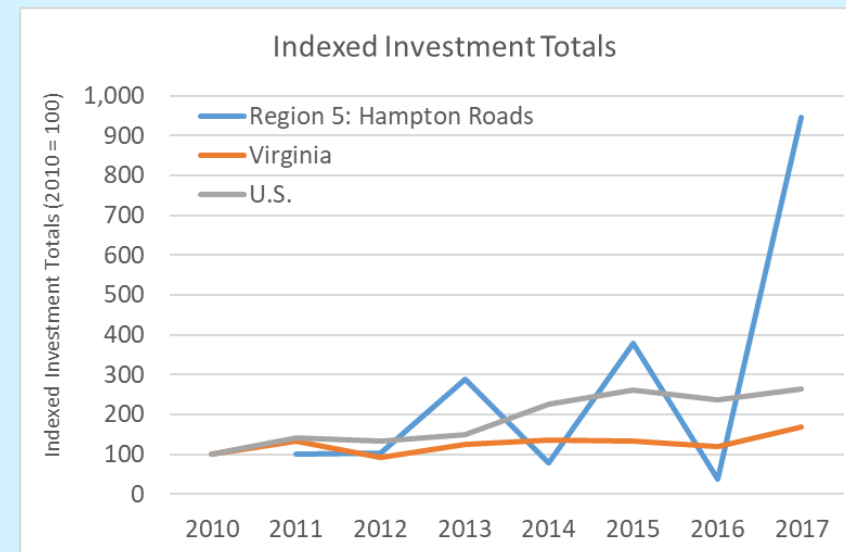

Strengths and Opportunities:

- New firm formation and employment in younger, traded sector Firms on par with mid-sized regions
- Numerous incubator and coworking spaces targeted to entrepreneurs found within the region, but level of sophistication of business services provided questioned.
- Pre-seed funding (accelerators and incubators) and angel investments stands out in the region. Angel funding in the region also moves further downstream and often invests seed funding as well.

Gaps and Weaknesses:

- High failure rate in year 2 transition may point to lack of support (both financial and services) for early-stage companies.
- Dip in survival between years 7 and 8 may point to lack of later stage risk capital and C-suite talent
- Early and later stage funding represents a small portion of the number of deals compared to state and nation
- Lack of indigenous Series A and B investors. When startups require larger Series A and B rounds, they are vulnerable to being relocated to be more proximate to investors since there is no lead investor of venture funding located in the region.

Venture Capital Growth in Region 5 in the last couple years stands out nationally

Assessment of Growth & Scalability in Region 5

Overall Assessment:

Uneven performance with significant opportunities to foster more retention and expansion of startups in the region.

Strengths and Opportunities:

- **Right ingredients in region to grow startup companies.** Stakeholders see a strong confluence of amenities and ecosystem components to support entrepreneurial development.
- **Growth from startup companies important for many existing and emerging industry clusters in the region,** with most industry clusters only growth coming as a result of the startup community.
- **Opportunity for talent generation** due to the number of higher education institutions in the region, but talent development needs to be aligned with regional needs.

Gaps and Weaknesses:

- Despite growth of highly educated workforce and positive in-migration from outside of Virginia, **concerns voiced by stakeholders of talent shortages to scale-up startups, despite in-migration.**
- **Lack of cohesive support for entrepreneurs across the region as well as the development of a number of siloed programmatic efforts that are not connected to one another is not allowing for the development of a critical mass of activity that can change the trajectory of economic trends.**

Contribution of Entrepreneurial Development to Traded Sector Industry Cluster Growth

Industry Cluster	Economic Development Position in Region	Contribution of Entrepreneurship
Agriculture & Food Processing	Sizable/Declining	Very Significant
Business Services	Sizable/Flat	Very Significant
Energy, Natural Resources, & Finished Products	Declining	Very Significant
Engineering, R&D, Testing & Technical Services	Specialized/Declining	Very Significant
Financial & Insurance Services	Emerging Strength	Very Significant
Health Care Services	Sizable/Growing	Very Significant
Information Technology & Communications Services	Sizable/Declining	Very Significant
Life Sciences	Declining	Very Significant
Manufacturing	Sizable/Declining	Very Significant
Ship Building, Aerospace, & Defense	Current Strength	Minimal
Transportation, Distribution and Logistics	Sizable/Declining	Very Significant

Potential Priority Actions Identified for Entrepreneurial Development which requires Sustainable Funding in Region 5

- Develop stronger ideation programming targeting traded sector startups
- Develop a mentor and serial entrepreneur network
- Support advancement of a Centralized Innovation Hub that integrates and supports accelerators-incubators-coworking efforts across the region
- Catalyze wider range of risk capital and broader network of investors in the region
- Engage regional corporate stakeholders in the advancement of commercialization, startups, and talent connections
- Establish a “regional entrepreneurial quarterback”

Potential Priority Action: Develop stronger ideation and commercial viability programming targeting traded sector opportunities

Rationale:

- Leverage increasing levels of interest and support for entrepreneurship within region's universities and federal labs to increase level of ideation and commercial viability opportunities
- Limited ideation outreach to broader base of non-university potential traded sector entrepreneurs
- Opportunity to support small innovation businesses that receive or seek SBIR awards
- Opportunity to sustain 757 Accelerate's efforts into future years as well as expand efforts into additional cohort domain areas
- Need for increased amount of funding dedicated to Proof-of-Concept Funds

Possible Activities:

- Sustain and expand 757 Accelerate to ensure out-year funding and to providing new funding for bolt on verticals with focused acceleration
- Expand ideation programs to specifically target faculty and graduate/undergraduate students across all of the region's universities
- Expand ongoing regional capacity to offer an inter-connected ideation program for potential entrepreneurs led through 757 Accelerate in partnership with ICAP (possibly institutionalizing a virtual model of ICAP) and regional universities such as ODU
- Create additional Proof-of-Concept Funds to support increased deal flow
- Create SBIR Assistance Program to help with grant writing and administration

Illustrative Best Practice Examples:

- Chattanooga, TN: Co.Starters 9 week lean startup program followed by Co.Lab Accelerator mentoring program for high-growth potential startups
- Oklahoma: i2e Venture Assessment Program designed to help entrepreneurs investigate product/market fit of a new business concept through a five week program of workshops and individual feedback and direction with follow-on recommendations on next steps needed to advance business concept

Potential Priority Action: Develop a mentor and serial entrepreneur network

Rationale:

- Difficulty in securing C-level talent that can drive scalable growth
- Issue compounded by a lack of organized/accessible network of serial entrepreneurs with the business expertise/acumen to guide startup companies
- As a result of the current lack of serial entrepreneurs, it is vitally important to develop a network of seasoned mentors who will provide assistance to promising innovative companies, helping them access key customers and markets, as well as provide guidance that will, in turn, make them more attractive to the risk capital community. As noted in the data, the region's loss of companies in year 5 to 7 may be caused in part by firms moving elsewhere in search of managerial caliber candidates.

Possible Activities:

- Leverage, grow, and expand 757 Accelerate Mentor Network, which is designed to ensure consistent, significant, value-added assistance to high-growth companies that are fundable but lack C-level talent thereby raising the entrepreneurial acumen of the management teams, in essence helping to grow the region's management talent
- Build a network of qualified service providers who have a track record of working with startups at different stages of development who are interested in offering periodic workshops, one-on-one counseling sessions, and interim/fractional executive leadership to high-growth potential startups. Invite mentors to have free coworking hours at entrepreneurial hubs.
- Work with faculty at regional MBA programs to create an entrepreneurial design program, similar to what many engineering schools offer, to engage faculty-led student teams to collaborate with management teams and compete in national/international graduate-level business plan competitions.

Illustrative Best Practice Examples:

- Austin: Austin Technology Incubator has a network of over 300 members of the Austin tech community – people who have been successful as entrepreneurs, executives, investors, technologists, professionals – to ensure we match the right people to the right problems at the right companies.
- Nashville: Vanderbilt Wond'ry Innovation Garage program pairs a corporate sponsor with teams of Vanderbilt students and faculty to tackle an issue or project identified by the company, with both undergrad and graduate students participating and committing to 5-10 hours per week.
- LaunchTN: LaunchTN Networks offer early-stage companies access to expert mentors through a systematic program modeled after San Diego's successful CONNECT Springboard. Companies that are involved in the network focus on developing a sharp, informative pitch ready to present in front of investors.
- Raleigh-Durham: Blackstone Entrepreneurs Network North Carolina that provides expert venture coaching through a veteran group of EIRs

Potential Priority Action: Support advancement of a Centralized Innovation Hub that integrates and supports accelerators-incubators-coworking efforts across the region

Rationale:

- There are pockets of entrepreneurial activity found across the region, but the efforts are focused on micro-sub-regions and not connected to one another.
- Even within the micro-sub-regions, the various efforts are often fragmented and disconnected from one another
- Many of the efforts that do exist are not necessarily focused on traded sector industries, and the impacts can be diluted as organizations try to “be all things to all people”.

Possible Activities:

- Support a centralized innovation hub for the region that houses the region’s signature programs thereby elevating the perception of robust activity to both internal and external audiences. The Hub is envisioned as being the central location for regional services and will also provide subsidized physical space
- Leverage existing entrepreneurial efforts across communities in Region 5 by creating a collaborations to develop shared programs, mentor networks, outreach activities, pitch competitions, etc. (a Hub and Node model)
- Leverage 757 Accelerate as a follow-on to proposed ideation services for identified high-growth potential startups, especially targeting cohorts to specific industry clusters and market opportunities
- Engage with 757 Angels and individual angel investors to develop a strong pipeline of investment-ready new venture startups
- Sustain, leverage and build upon the efforts of StartWheel to bring more cohesion and connection points between the various efforts.
- Build upon the 757 Launch Event to develop a more robust culture/ecosystem of entrepreneurial events/activities

Illustrative Best Practice Examples:

- Birmingham, AL: Innovation Depot, a 140,000 incubator/coworking space, is home for a variety of entrepreneurial and talent initiatives in collaboration with community stakeholders and UAB, including a new technology accelerator, Velocity, that invests up to \$50k in seed funding for selected startup teams.
- Charlotte, NC: Within their entrepreneurial hub, known as Packard Place, offers a network of accelerator program services including in cleantech, fintech and more general tech-based businesses
- Greenville, AL: Led by the NEXT program of the Greenville Chamber, brings a strong focus on entrepreneurial and innovation-focused small businesses, with three different facilities, including one targeted for advanced manufacturing, mentoring programs, events and other ecosystem development efforts.
- Gainesville, Florida: Multiple types of entrepreneurial hubs including Sid Martin Biotech, Florida Innovation Hub, Innovation Square and smaller incubators located near smaller high education institutions.

Potential Priority Action: Catalyze wider range of risk capital and broader network of investors in the region

Rationale:

Region 5 needs to build upon its success in establishing 757 Angels and develop larger tranches of growth capital for its successful base of startup companies as they seek to scale up.

Given the diverse base of startups across traded sector industries in Region 5, it is important to have investment vehicles that are comfortable and have the “know-how” to invest in a diverse array of industries.

Possible Activities:

- **Form a region or multi-regional seed fund** able to bridge angel investors and more formal venture capital, with ability to lead syndication at seed stage and participate in follow-on early stage rounds
- **Consider establishing a Small Business Investment Company to provide working capital financing for scaling-up traded sector startups that are generating revenues.** Under the SBIC model, private investors participate as limited partners of the SBIC and their investments are matched by the federal Small Business Administration \$2 to \$1. SBIC investments are structured as either debt, equity or a combination of both.
- **Further support 757 Angels by providing funds for management funds and due diligence. Address need for increased funding of statewide angel investment tax credit.** There is a \$5 million cap in available credits each year, after which credits are prorated, which makes its benefit level uncertain for investors.
- **Create investor education events** to broaden the network of investors in the region across advanced industry clusters.
- **Develop syndication plan** for entire capital stack in order to leverage other Virginia funders.

Illustrative Best Practice Examples:

- Chattanooga, TN: Two seed funds are active in the region, Chattanooga Renaissance Fund and Lamp Post Group.
- Ohio Third Frontier: 34 pre-seed or seed funds established across regions of Ohio, capitalized at approximately \$6-\$7 million on average, with matching state investments.

Potential Priority Action: Engage regional corporate stakeholders in the advancement of commercialization, startups, and talent connections

Rationale:

- Many traditional traded sector industry clusters are declining and emerging clusters. However, all of the clusters are having strong contributions from startup activity
- Limited connectivity between corporate innovation and startup community, which in turn limits the opportunities to develop first customers within the region
- Need to address talent retention in the region not just for entrepreneurial talent, but for scaling up startup and existing businesses
- Strengthen regional capabilities in working with startup and existing businesses in commercial viability of new product development

Possible Activities:

- Re-evaluate industry clusters and facilitate bringing together entrepreneurs and innovation-oriented existing businesses from around the region in specific industry clusters to form an industry innovation network. Networking activities could include:
 - Technology and market intelligence workshops
 - Peer to peer networks across CEOs, CTOs
 - Investor forums/pitch competitions
- Design workshops that engage corporate stakeholders to better understand their needs and opportunities, then source problem statements to the startup community to create linkages and first customer efforts
- Establish a talent outreach program that supports experiential learning projects and internships with students in relevant courses/degree programs through collaborations with faculty

Illustrative Best Practice Examples:

- Chattanooga, TN: Focused on targeted industry innovation networks through ongoing accelerator programming including ultra-high bandwidth business applications, consumer goods, outdoor recreation and food/beverage.
- Greenville, SC: Focused on regional opportunity with strong presence of foreign auto makers to establish International Center for Automotive Research that represents significant public/private partnership and involves a Center for Emerging Technologies. Plus, strong focus on entrepreneurial programs for advanced manufacturing through Chamber's entrepreneurial program efforts.
- Raleigh-Durham: NCBioTech Center, a long-established resource supporting growth of life sciences with a historical focus on the Raleigh-Durham region. Has formed interest groups in specialized life sciences areas to pursue new opportunities and collaborative efforts, which has led to spin-off resources such as in forest biotechnology.

Proposed GO Virginia Action: Establish a “regional entrepreneurial quarterback”

Specific Activities:

- Identify opportunities and needs for regional entrepreneurial development within traded sector industries
- Ensure an implementation capacity on priority actions
- Provide a “front door” in each region for entrepreneurs to receive coordinated services among service providers

Service Delivery Approach:

- Performance-based grants developed in consultation with each region to address priorities
- In each region, an advisory committee will be created to oversee the efforts of the regional quarterbacks
- Potential for multi-regional applications
- VRIC proposal articulates additional entrepreneurial activities that need to be coordinated with the regional GO Virginia efforts

Budget Rationale:

- The regional quarterback would be tasked with advancing a regional strategic plan and prioritizing strategic investments, with the input from regional entrepreneurial ecosystem stakeholders, under the auspices of the GO VA Regional Boards.
- Once a regional prioritization investment plan is developed, further funding would be available in FY 2020 and thereafter to fill the gaps identified, including funding for efforts such as: EIRs, incubators, accelerators, mentor networks, etc.

Comparable Best Practice Model: *Launch Tennessee*

- Supports a network of Entrepreneur Centers, located in six cities across the state that provide entrepreneurs access to a mix of support services, including: wayfinding for entrepreneurs, boot camps, mentorship, co-working space, and initial pre-seed grants.
- In 2016, Launch Tennessee made grants to its Entrepreneur Centers of \$200,000 to \$375,000 for each center. These centers serve a much smaller area than GO Virginia regions.

Appendix A: Listing of Working Group Members

Working Group:
Regional Council 5
Task Force on
Startups/Innovation/
Commercialization

- Anne Conner, TowneBank
- Monique Adams, 757 Angels
- Nancy Grden, Institute for Innovation & Entrepreneurship, Old Dominion University
- Evans McMillion, 757 Accelerate
- Chris Shelton, StartWheel

Appendix B: Quantitative Trendlines on Entrepreneurial Development

Initial Analysis of Entrepreneurial Dynamics in Your Region's Traded Industry Sectors

Key Measures:

- Job distribution by age of firm
- Job creation by age of firm
- Business formation rates of start-ups
- Survival rates of startup companies
- Examining key elements of “net” employment growth
- The contribution of high-growth startups compared to all startups

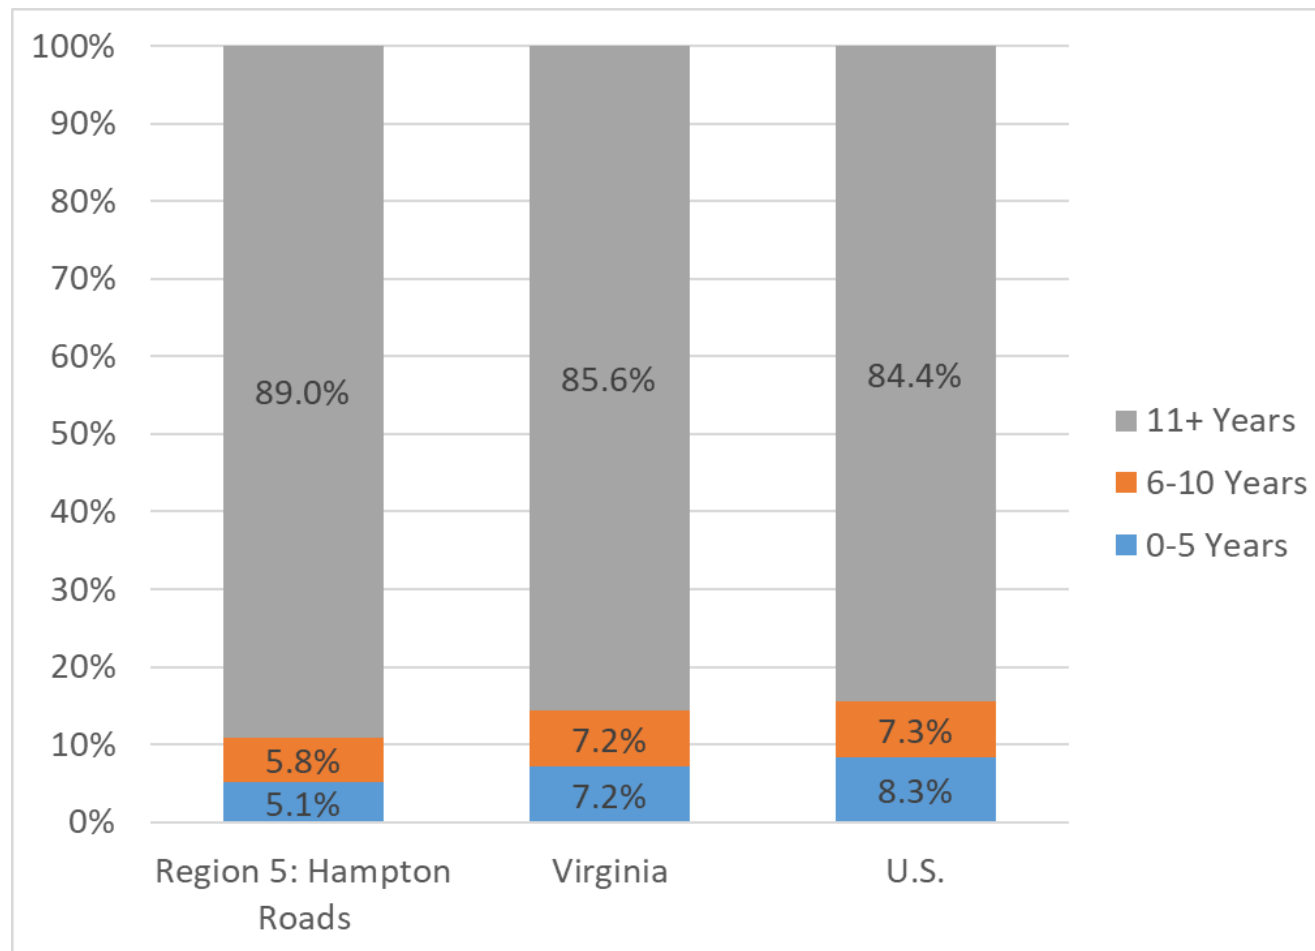

Note on Data Sources:

- Two data sources used to provide a full depiction of entrepreneurial dynamics:
- ***The Quarterly Workforce Indicators (QWI) from U.S. Census*** is a new longitudinal database with detailed data related to the job creation and other characteristics of firms, including by age groupings.
 - ***Most Detailed Level of Geographic Coverage:*** County
 - ***Coverage:*** Covers over 95% of U.S. private sector jobs (does not cover ag jobs, self-employment)
 - ***Grouping of Employment by Age of Firms:*** 0-1 Years; 2-3 Years; 4-5 Years; 6-10 Years; 11+ Years
 - ***Industry Coverage:*** 2-digit industry, which can define at a high-level traded sector industries
 - But QWI does not provide intelligence at the firm level
 - All data is on a quarterly basis
- **The Business Dynamics Research Consortium (BDRC) database** is a time-series dataset that catalogues individual establishments by location, employment, sales, and industry from 1997 to 2017. The BDRC It is maintained by the University of Wisconsin
 - Coverage: It compiles multiple data sets to track performance and growth for more than 144 million individual businesses across the United States.
 - Provides extensive firm level data
 - Able to identify firm by address
 - Detailed industry coverage

Regional Employment Distribution by Age of Firm for Traded Sector Industries

- Majority of employment base is contained within older firms, mirroring wider state and national trends

Traded Sector Employment Levels by Firm Age as a Percentage of Total Employment, Averaged 2008 Q1 through 2017 Q2

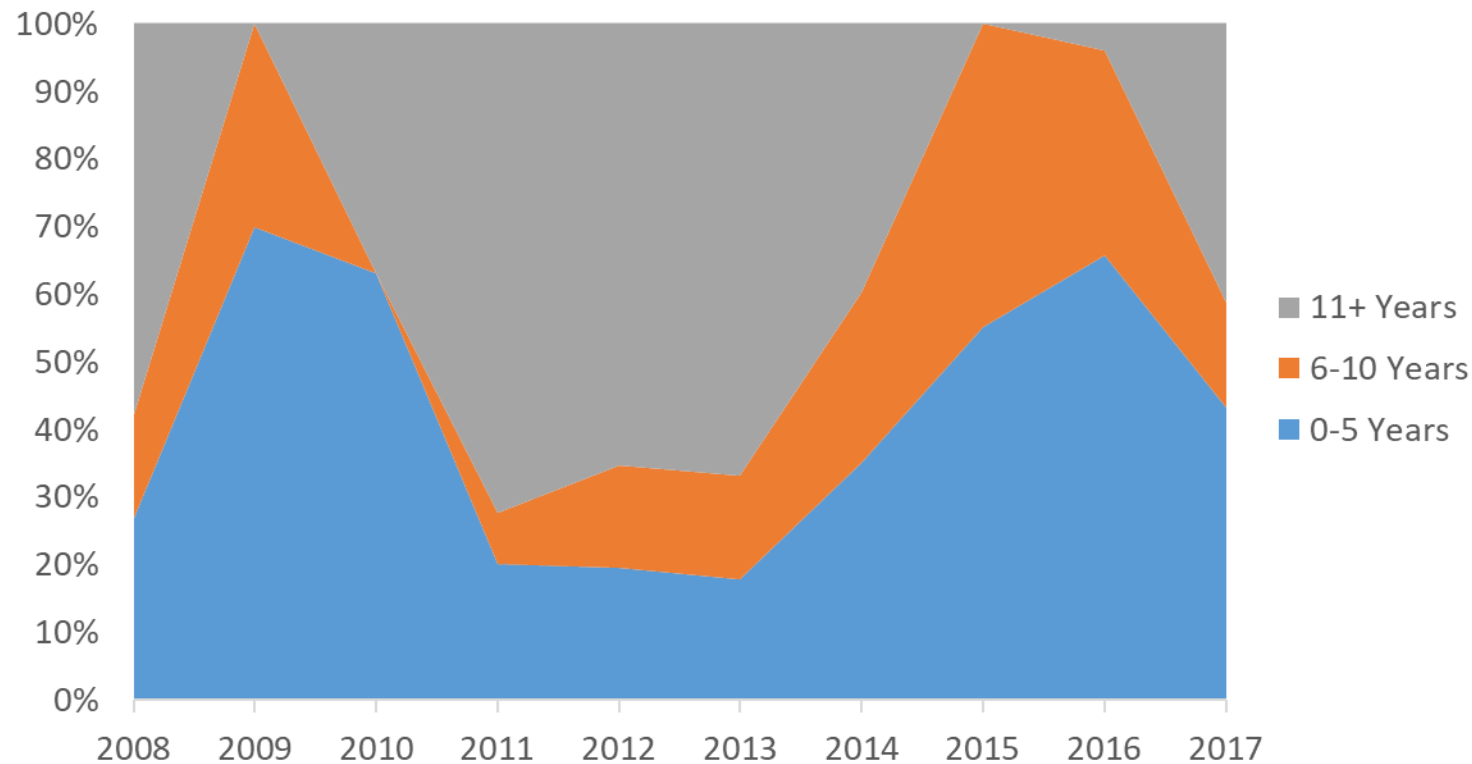

Source: U.S. Census Bureau Quarterly Workforce Indicators dataset.

Trends in Net Job Growth Generation by Age of Firm for Traded Sector Industries: Young start-ups are increasingly driving net job change

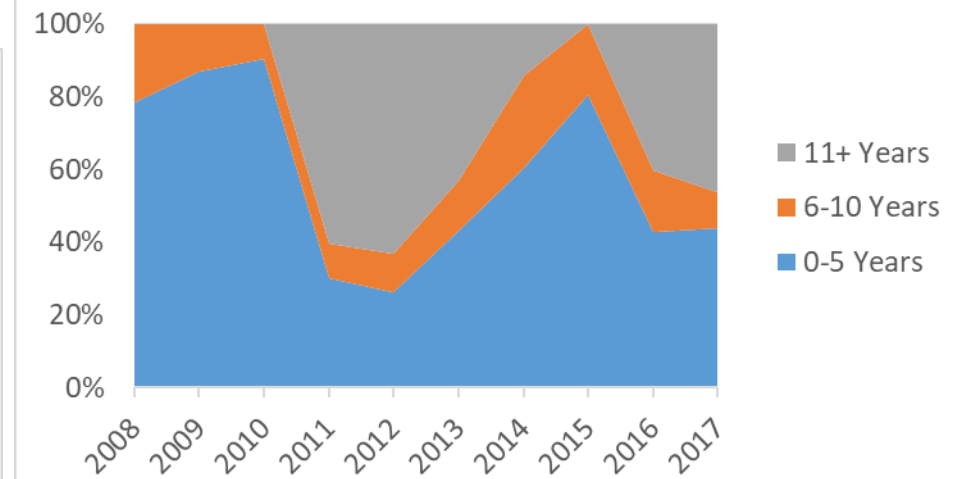

Traded Sector Net Job Change by Firm Age, 2008 Q1 through 2017 Q2

Region 5: Hampton Roads

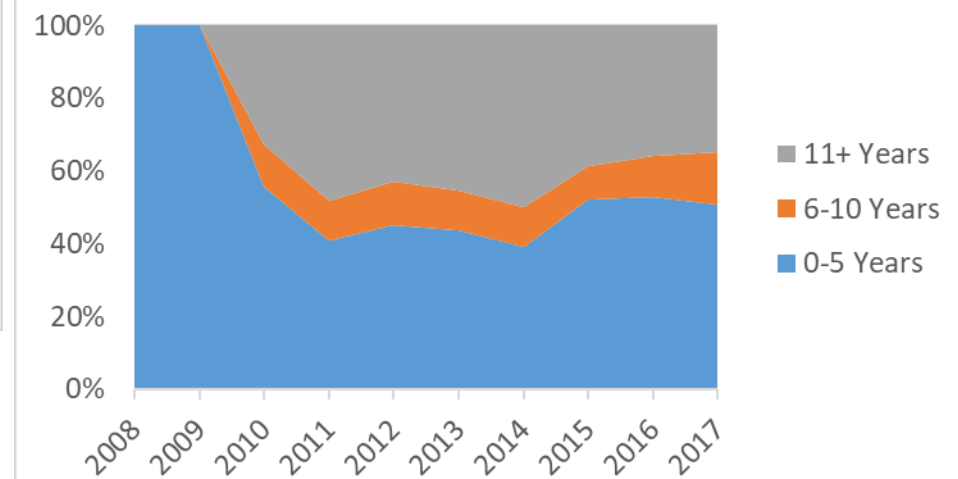

Source: U.S. Census Bureau Quarterly Workforce Indicators dataset.

Virginia

U.S.

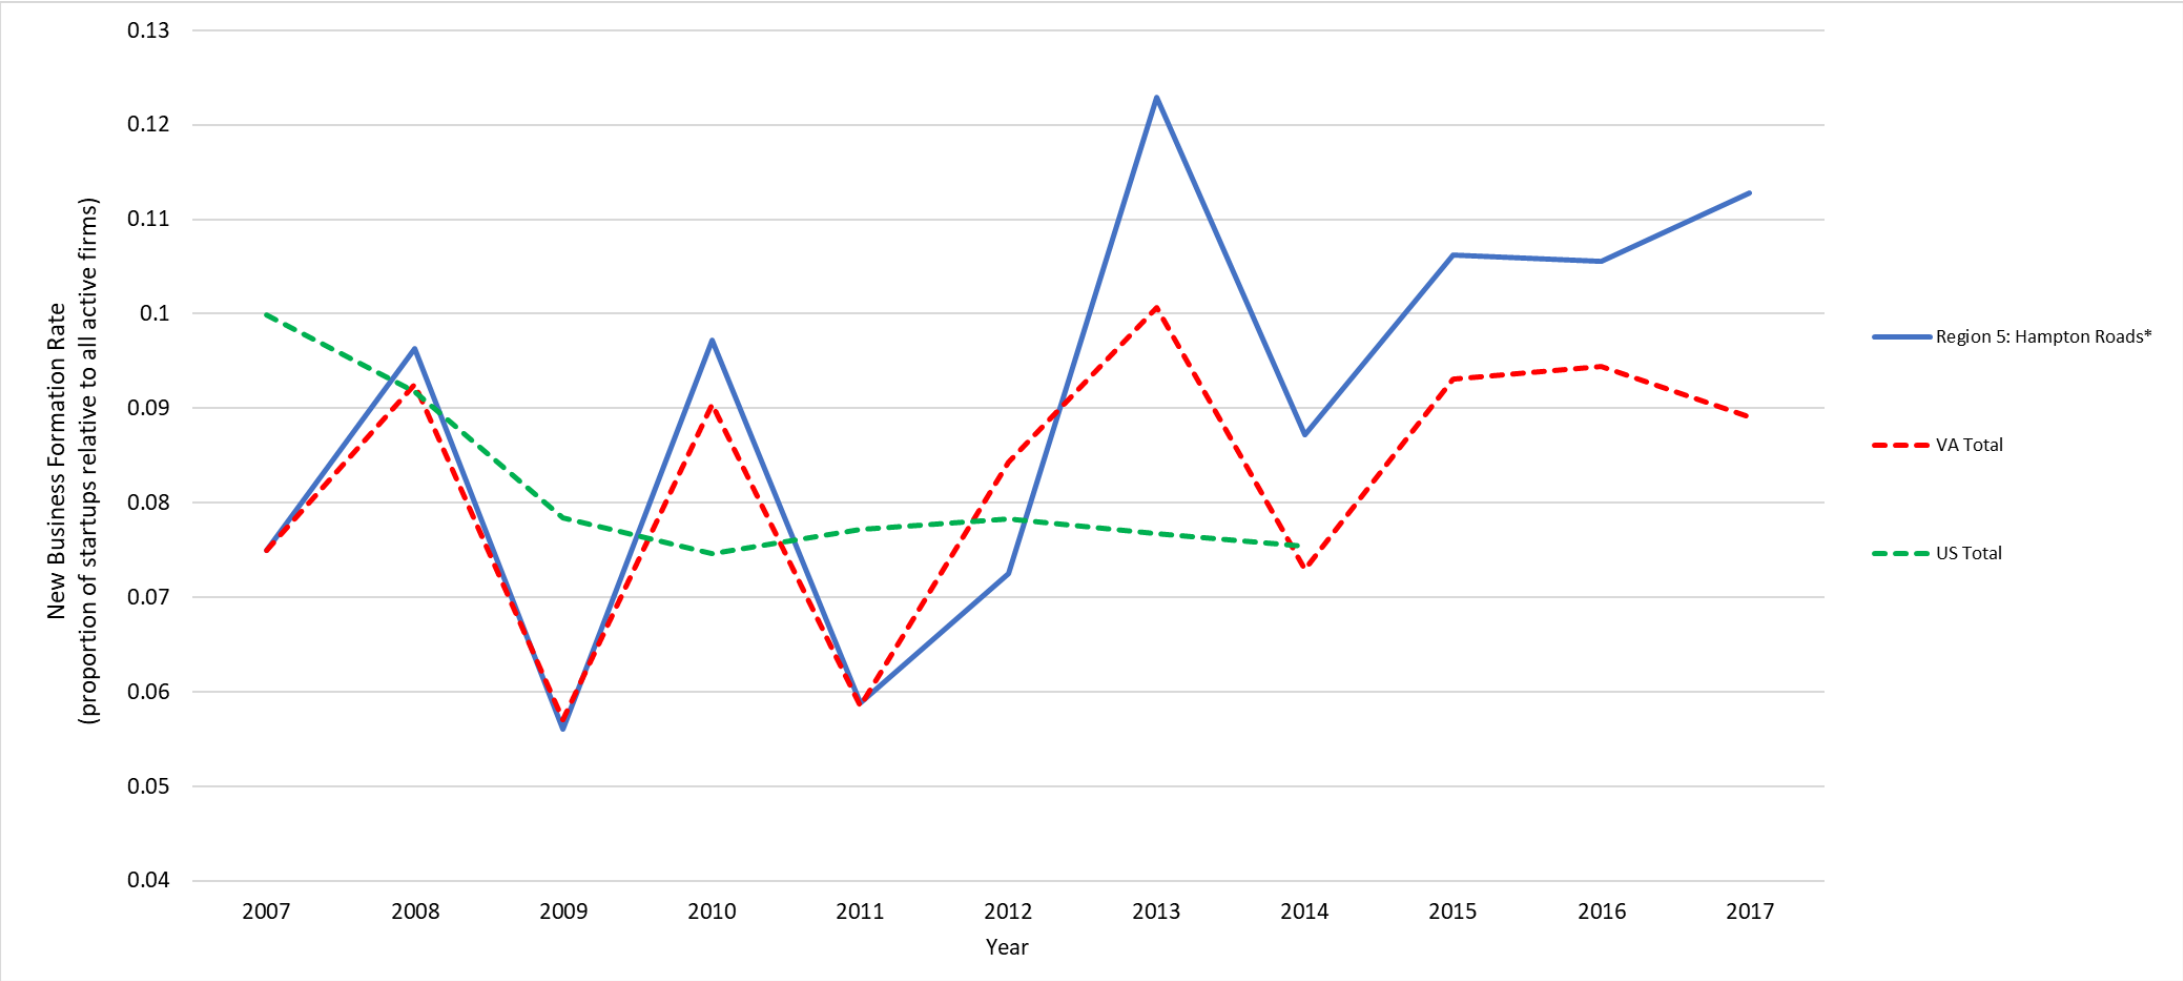

BDRC Profile of Startup Activity Trends in Region

Founding Year of Startup Cohort*	Number of Startups in Traded Sector Industries	Number of Startups Surviving by 2017	Start-up Employment Levels 2017
2007	698	208	2,084
2008	774	243	1,768
2009	469	138	984
2010	937	283	2,085
2011	443	159	1,053
2012	650	289	1,806
2013	1,236	441	3,176
2014	883	452	2,492
2015	921	590	2,960
2016	980	597	2,871
2017	847	847	3,697

*Composed of all new non-branch firms with first recorded employment activity in a given year

Overall New Business Formation Rates for Region Based on BDRC Firm Level Data

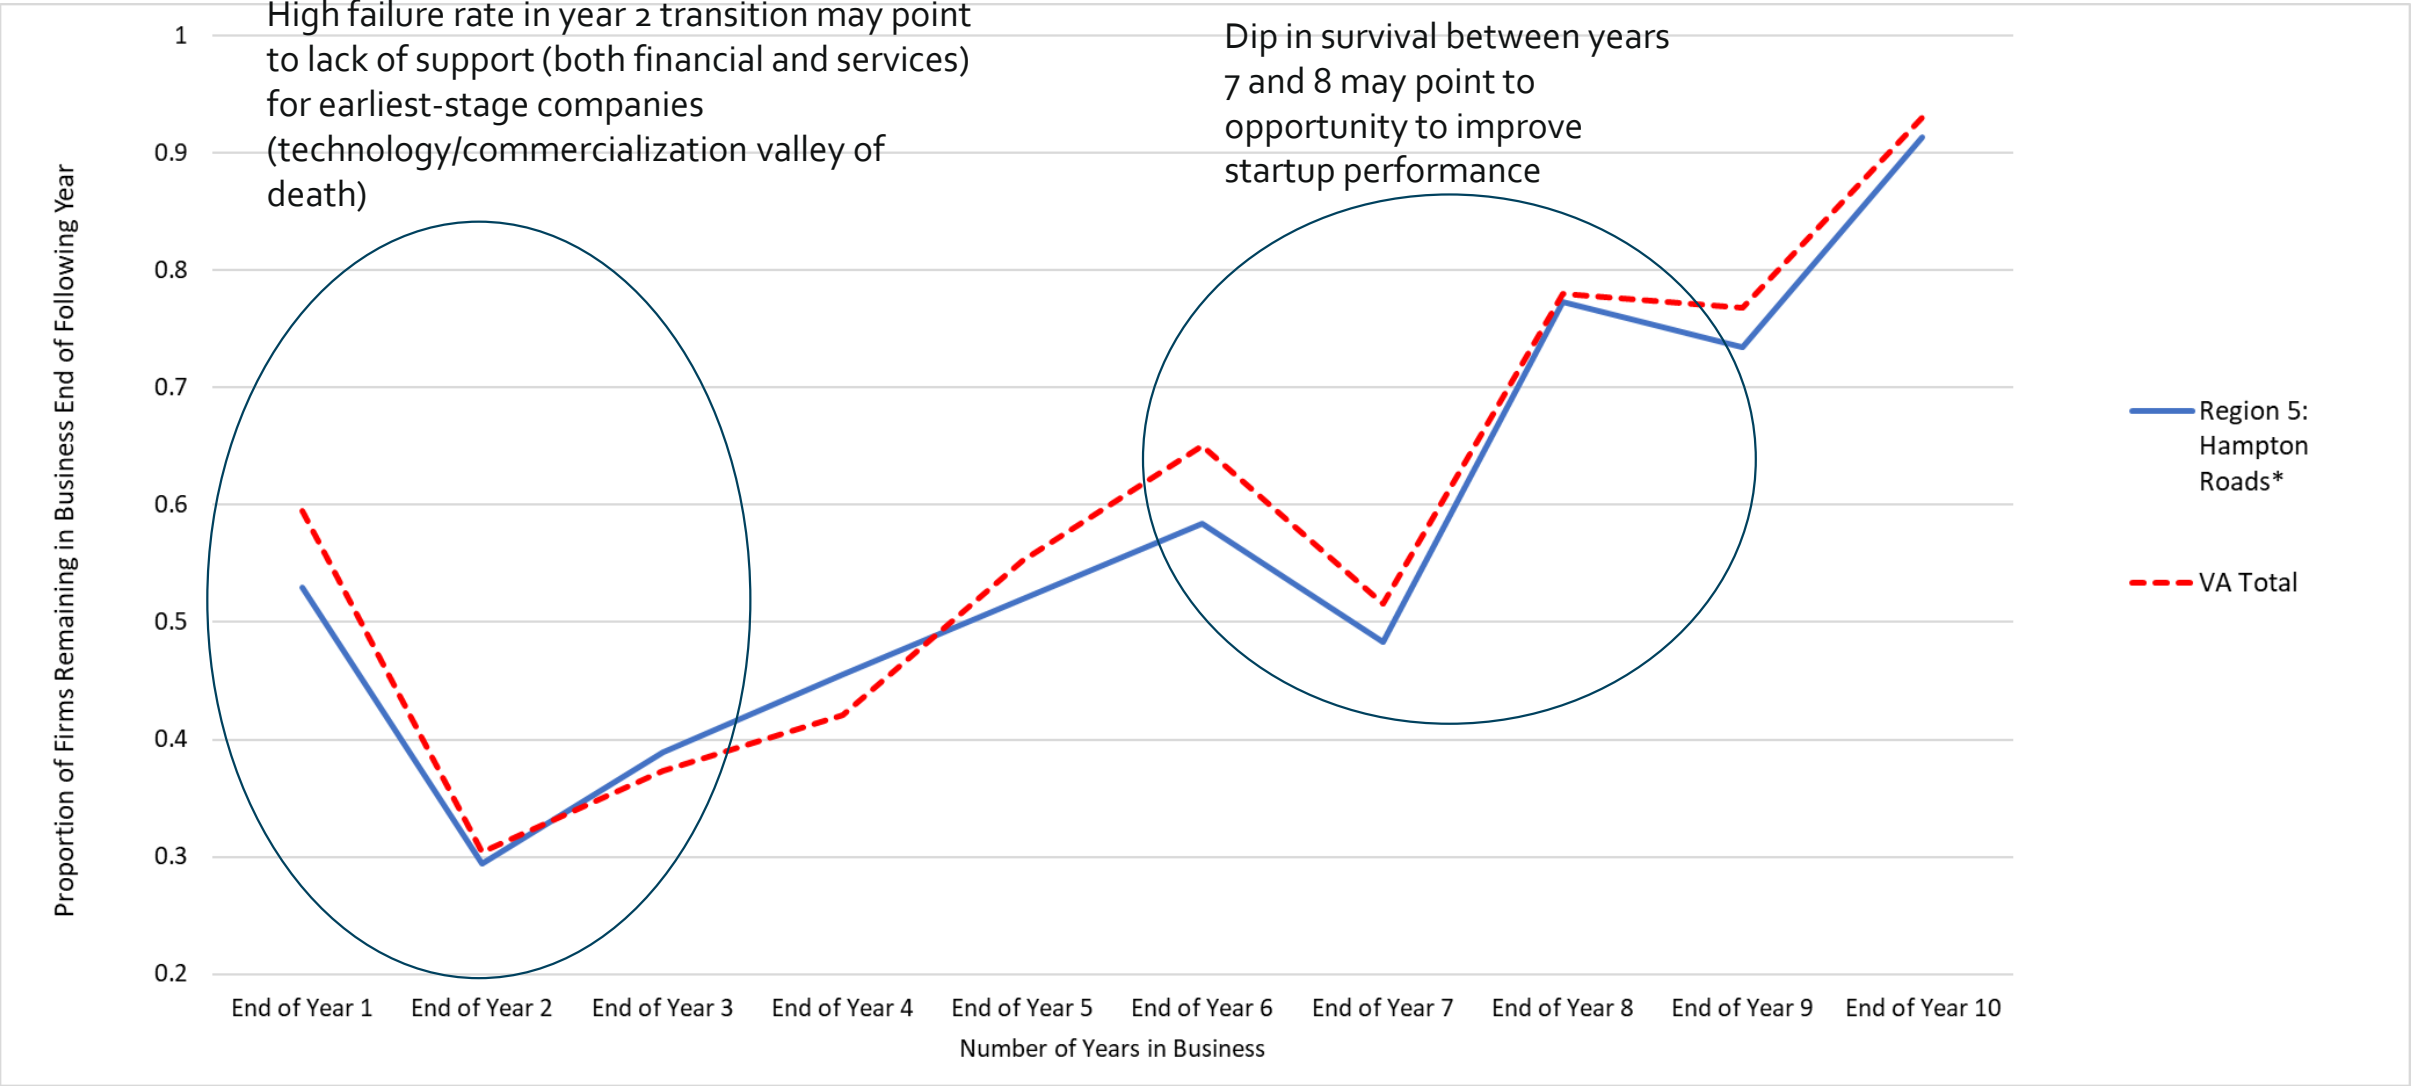

- Trends in overall new business formation rates for region closely mirror overall state activity patterns, and beginning to outperform state levels consistently by 2013

*US new business formation rates available to 2014 via US Longitudinal Business Database

Year over Year Survival Rate Trends in Regional Traded Sector Startups

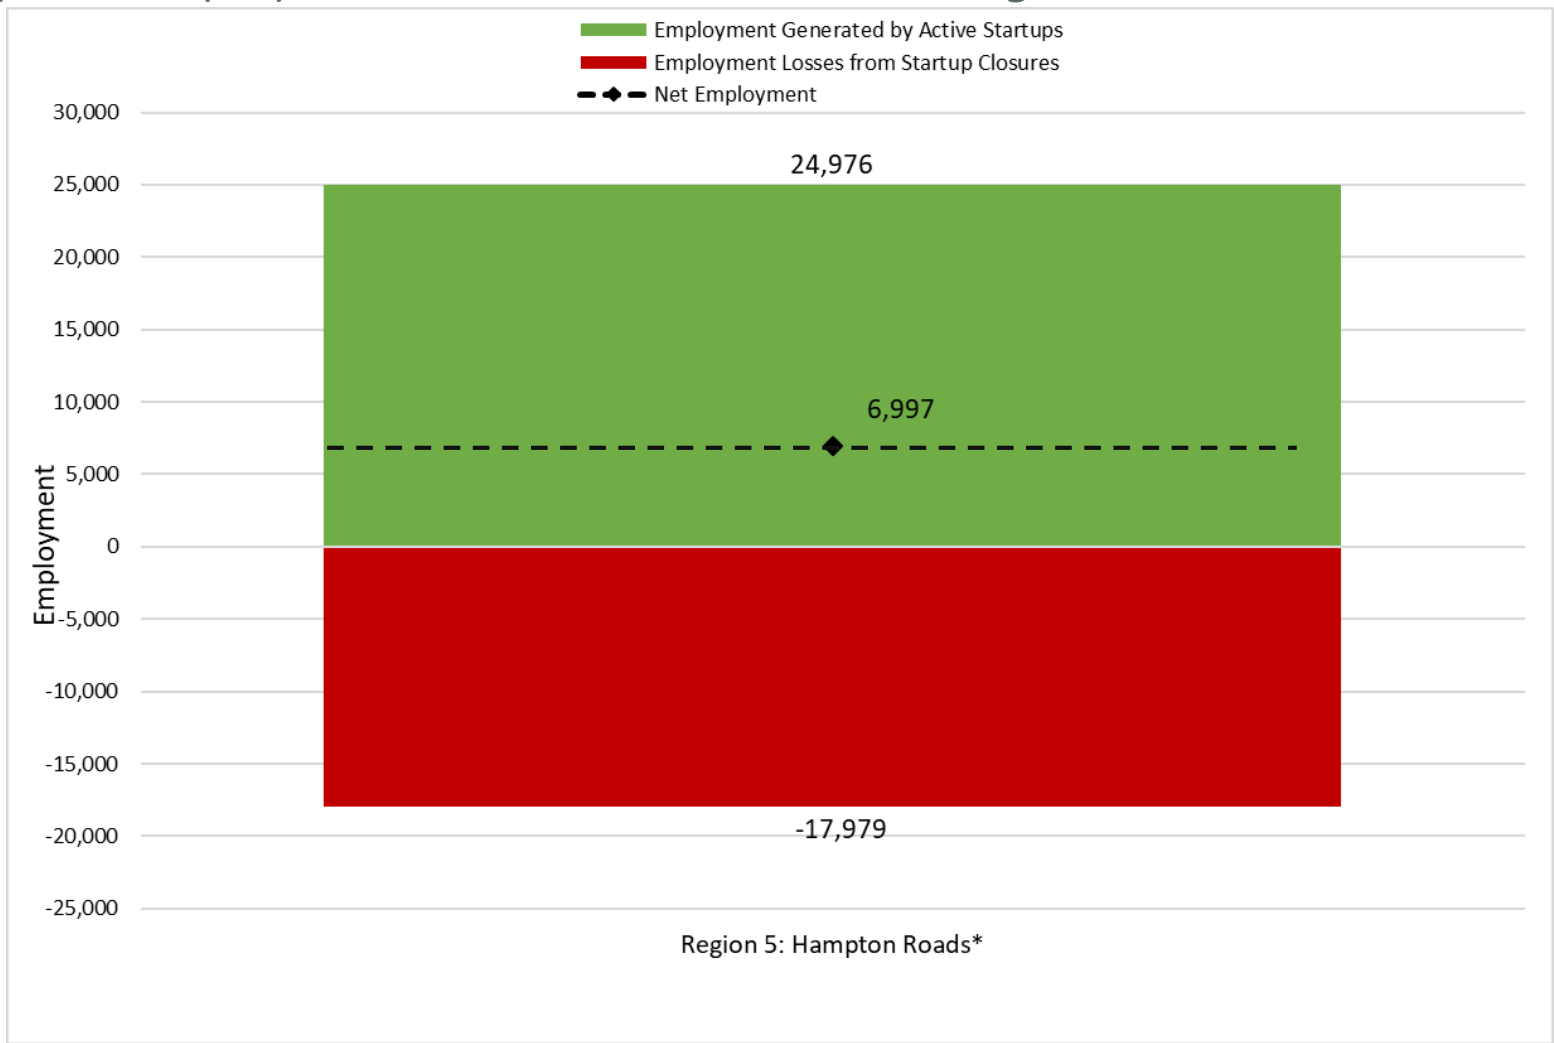

Cumulative 10-year startup cohort survival rates for region are 52.5% compared to a VA statewide rate 53.5%

*Startups defined as having firm age <10 years as of 2017

Net Employment Impacts Generated by Traded Sector Startup Firms in VA

- Significant churn within startups, though net employment gains from those surviving startup firms far outpaces employment loss from failures across region

	Total Virginia Startups, 2008 (Q2)-2017(Q2)
Employment Generated by Active Startups	155,033
Employment Losses from Startup Closures	-98,732
Net Employment	56,301
Region 5 Share of Statewide Net Employment	12.4%

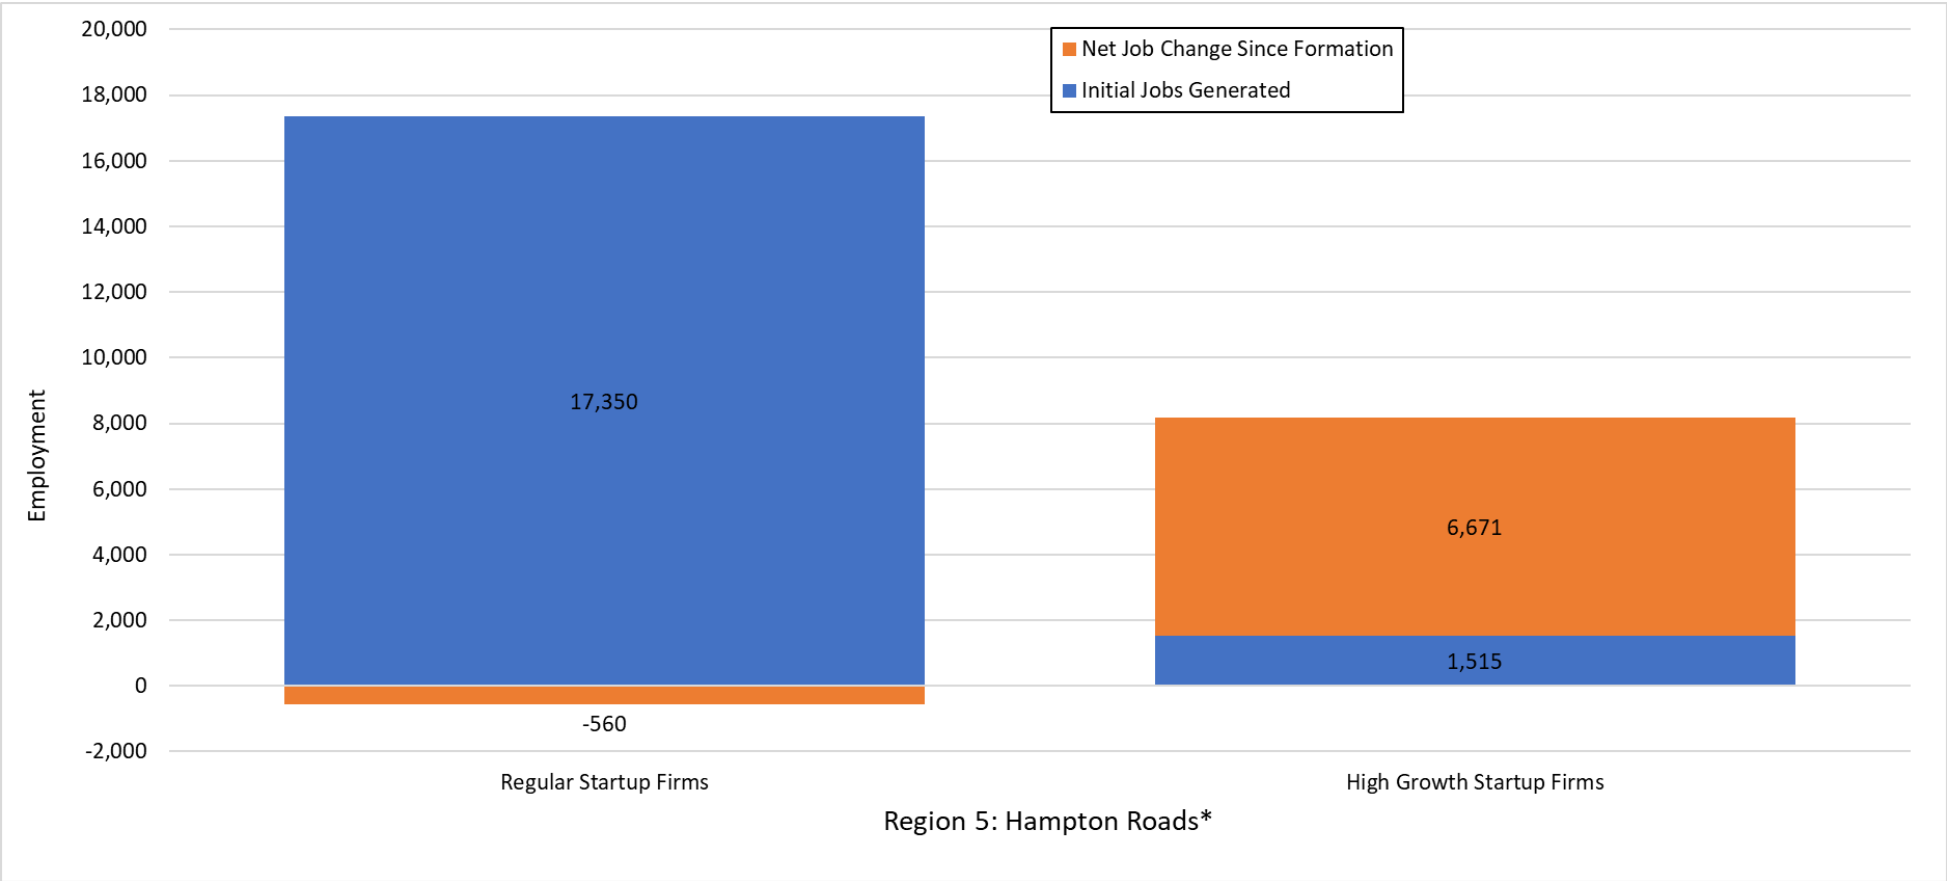

*Indicates GO Virginia regions with research universities

**Startups defined as having firm age <10 years as of 2017

Employment Growth Impacts Generated by Current Traded Sector Startup Firms in Region

- Key to long term success is high growth startups – disproportionate share of lasting gains in employment observed from cohort of startups exhibiting high annualized growth rates

	Total VA Regular Startup Firms	Total VA High Growth Startup Firms
Initial Jobs Generated	104,889	9,058
Net Job Growth Since Formation	506	40,781
Region 5 Share of Statewide Net Job Growth Since Formation		16.4%

*Indicates GO Virginia regions with research universities

**Startups defined as having firm age <10 years as of 2017, high growth startups defined as >25% annualized employment growth over lifetime of business

Profile of Startup Activity Within Key Regional Industry Clusters

- Region 5 Priority Clusters from 2017 Growth and Diversification Plan:**
- Port Operations, Logistics and Warehousing
 - Advanced Manufacturing
 - Cybersecurity, Data Analytics and Mod-Sim
 - Ship Building and Ship Repair
 - Water Technologies
 - Unmanned Systems and Aerospace

Major Industry Cluster***	Number of Startups in Cluster, 2007-2017	Number of Start-ups Surviving by 2017	Number of High Growth Start-ups in Cluster**	Start-up Employment Levels, 2017	Start-ups Industry Cluster Employment Concentration Index*
Agriculture & Food Processing	393	218	19	1,059	0.74
Business Services	4,895	2,385	275	10,636	0.90
Energy, Natural Resources, & Finished Products	231	108	27	1,114	0.68
Engineering, R&D, Testing & Technical Services	398	244	69	2,516	0.98
Financial & Insurance Services	1,183	541	63	2,060	0.79
Health Care Services	226	148	42	5,853	2.15
Information Technology & Communications Services	412	234	69	1,697	0.45
Life Sciences	261	134	26	955	0.94
Manufacturing	421	204	41	1,536	0.82
Ship Building, Aerospace, & Defense	52	30	8	528	1.70
Transportation, Distribution and Logistics	1,870	800	204	5,467	0.95

*Represents a measure of specialization in startup activity in certain industry clusters given overall state trends, >1.2 indicates highly specialized concentration of startup generation in industry area

**Defined as >25% annualized employment growth over lifetime of business

***Note: some industry cluster definitions include a mix of traded and untraded industry sectors

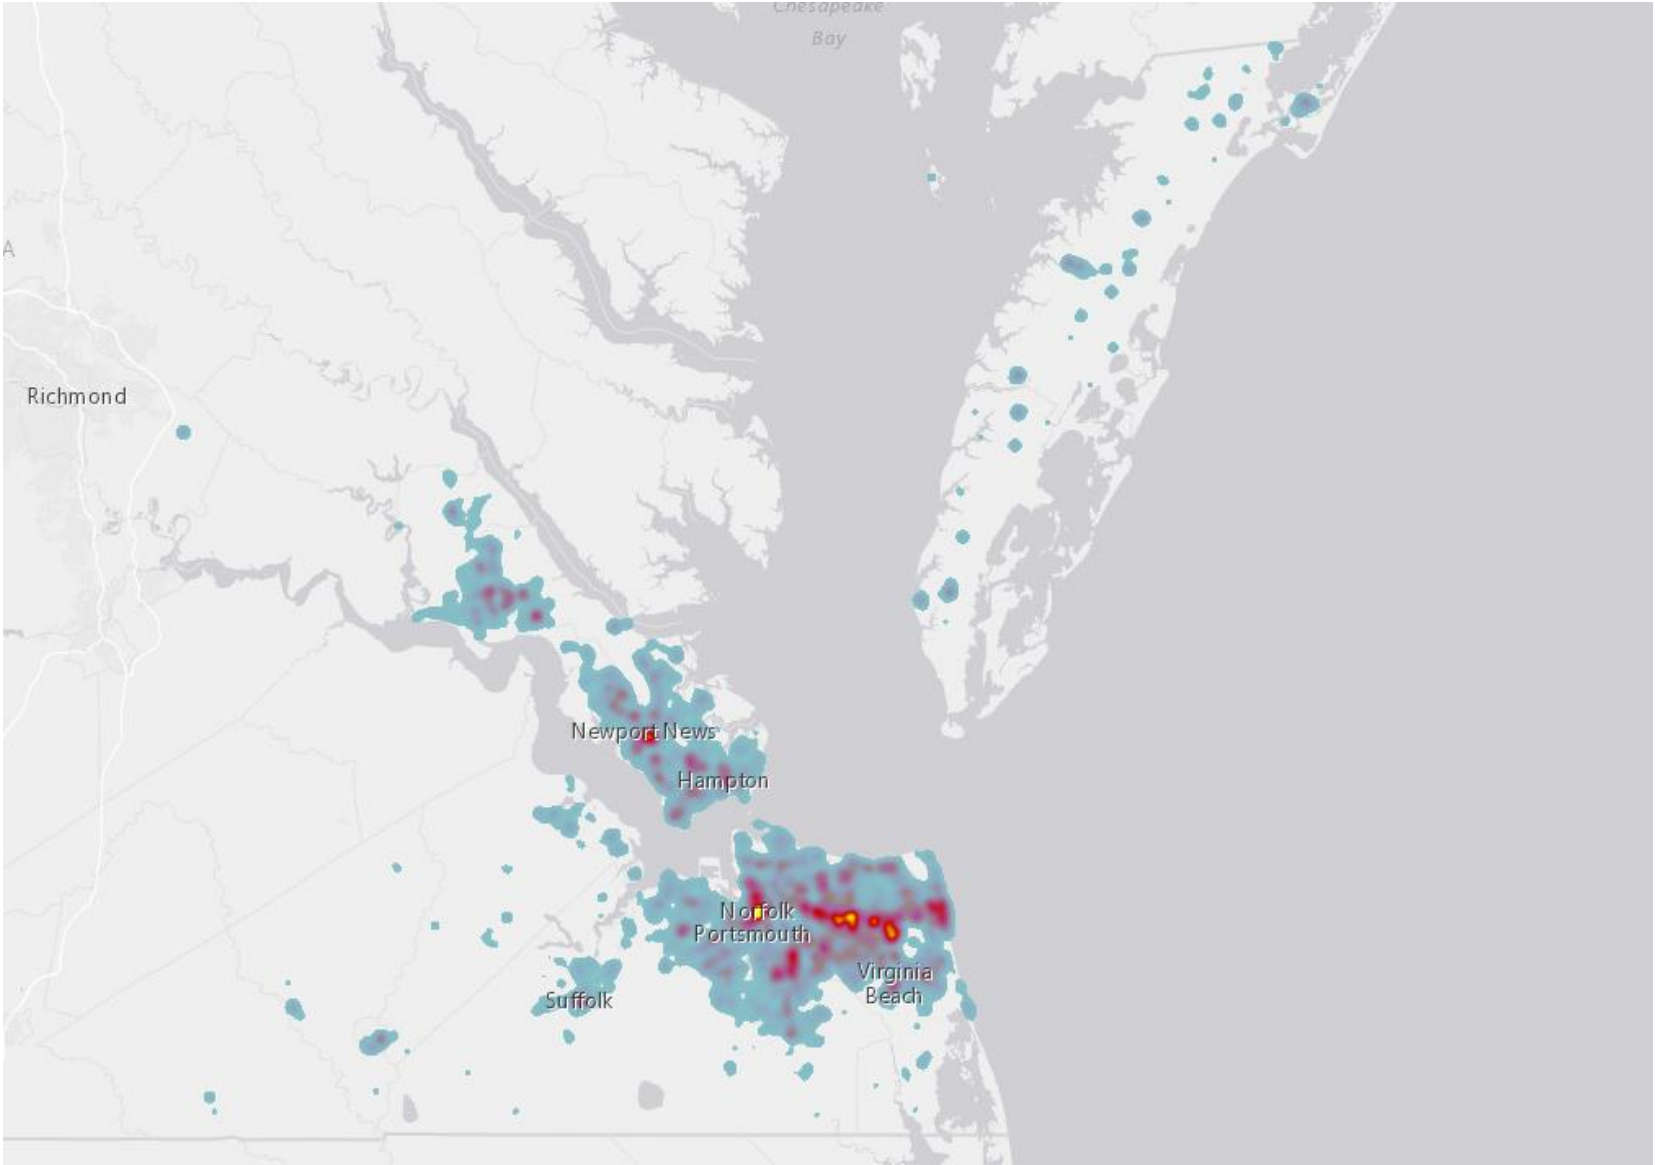

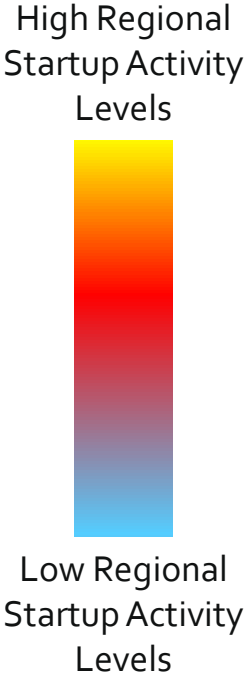

Contribution of Entrepreneurial Development to Leading Industry Clusters

Entrepreneurial activity has played a significant role within the region’s industry clusters:

- In all but one cluster, net job growth generated by startups has outpaced job growth generated by more established firms.
- Startups have had a very important role in the region’s emerging financial and insurance services industry cluster.

Industry Cluster	Economic Development Position in Region	Contribution of Entrepreneurship	Data Analysis						
			2017 Employment	2017 Location Quotient	Regional 2007-2017 Percentage Job Growth	U.S. 2007-2017 Percentage Job Growth	Net Job Growth, All Companies, 2007-2017	Net Job Growth, Startups, 2007-2017	Share Start-ups of All Net Job Growth, 2007-2017
Agriculture & Food Processing	Sizable/Declining	Very Significant	11,897	0.79	-17.8%	10.7%	-2,574	1059	>100%
Business Services	Sizable/Flat	Very Significant	33,182	0.87	0.3%	9.1%	89	10636	11911%
Energy, Natural Resources, & Finished Products	Declining	Very Significant	3,858	0.31	-33.9%	-13.3%	-1,978	1114	>100%
Engineering, R&D, Testing & Technical Services	Specialized/Declining	Very Significant	13,845	1.63	-10.1%	6.5%	-1,548	2516	>100%
Financial & Insurance Services	Emerging Strength	Very Significant	13,302	0.86	3.8%	-4.1%	484	2060	426%
Health Care Services	Sizable/Growing	Very Significant	23,222	0.95	4.0%	12.5%	893	5853	655%
Information Technology & Communications Services	Sizable/Declining	Very Significant	13,756	0.97	-1.7%	50.8%	-242	1697	>100%
Life Sciences	Declining	Very Significant	2,435	0.33	-10.5%	9.7%	-287	955	>100%
Manufacturing	Sizable/Declining	Very Significant	19,366	0.51	-17.3%	-13.5%	-4,056	1536	>100%
Ship Building, Aerospace, & Defense	Current Strength	Minimal	24,282	6.75	10.8%	-7.7%	2,374	528	22%
Transportation, Distribution and Logistics	Sizable/Declining	Very Significant	29,422	0.88	-4.2%	8.7%	-1,293	5467	>100%

Geographic Distribution of Traded Sector Startup Activity in Region 5

Closer Look at Subregional Entrepreneurial Activities

Virginia Beach, Norfolk, and Chesapeake lead in the number, jobs and high growth startups in the region ... but significant startup activity found throughout the region.

Subregion	Specific Counties/ Independent Cities	Number of Startups Formed in Traded Sector Industries Since 2007	Start-up Employment Levels 2017	Number of High Growth Startups Since 2007 with 10+ Employees	Industry Clusters with 10+ High Growth Companies of 10+ employees in 2017
Virginia Beach	Virginia Beach City	3,560	7,283	49	Business Services; IT & Communications
Norfolk	Norfolk City	1,063	4,557	46	TDL
Chesapeake	Chesapeake City	1,174	3,603	36	TDL
Historic Triangle	York, James City counties; Williamsburg City	714	2,510	20	
Newport News	Newport News City	702	2,193	20	
Hampton/Poquoson	Hampton City, Poquoson City	533	1,560	12	
Portsmouth	Portsmouth City	325	1,453	19	
Southern Region	Isle of Wight, Southampton counties; Franklin City, Suffolk City	537	1,258	2	
Eastern Shore	Accomack, Northampton counties	230	559	5	
Region Total		8,838	24,976	209	

Key Measures:

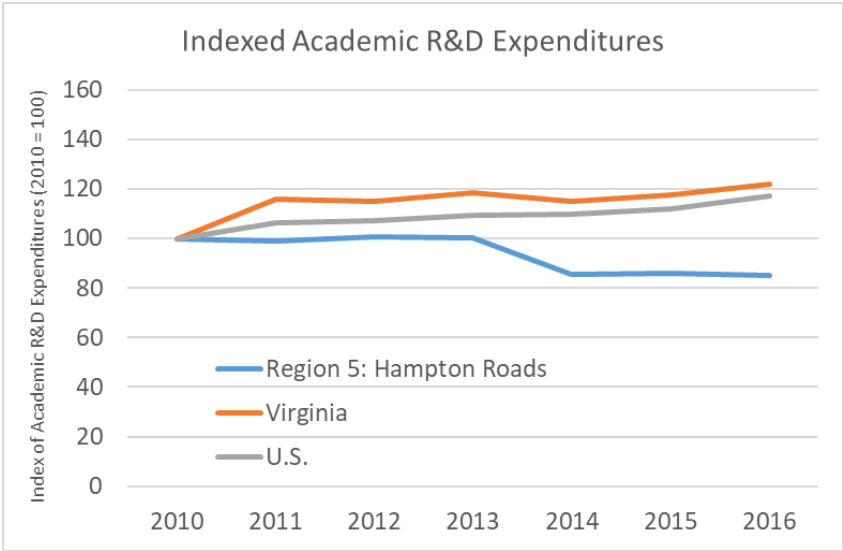

- R&D and Commercialization
- Patent Activity of Inventors Residing in Region
- Venture Capital
- Federal Small Business Innovation Research Awards

R&D Expenditures and Commercialization

- Academic R&D has declined since 2010
- Academic R&D is distributed across numerous fields, including life sciences, geological/atmospheric/oceanic, engineering, and physical sciences, as well as numerous institutions
- Region lags the nation in technology and commercialization efforts
- Also presence of federal lab R&D

Academic R&D Expenditures (Millions)

Region 5	2010	2011	2012	2013	2014	2015	2016	Total
All Institutions	\$221.4	\$219.5	\$223.1	\$221.5	\$189.6	\$190.4	\$188.6	\$1,454.2

Region 5: Hampton Roads	Total
Old Dominion University	\$605.3
College of William and Mary	\$413.7
Eastern Virginia Medical School	\$281.7
Other Institutions	\$153.5
Grand Total	\$1,454.2

University Technology Transfer Metrics Per \$10M in Research Expenditures, FY2017-2018

Region	Hampton Roads	U.S. Average, All Research Universities
Disclosures	2.54	3.72
Licenses/Options Executed	0.09	1.04
Startups Formed	0.09	0.13

Source: SCHEV Survey

R&D Expenditures at Federally Funded R&D Centers (Millions)

Region 5: Hampton Roads	2010	2011	2012	2013	2014	2015
Thomas Jefferson National Accelerator Facility	\$94.4	\$90.5	\$94.2	\$100.0	\$105.9	\$128.0

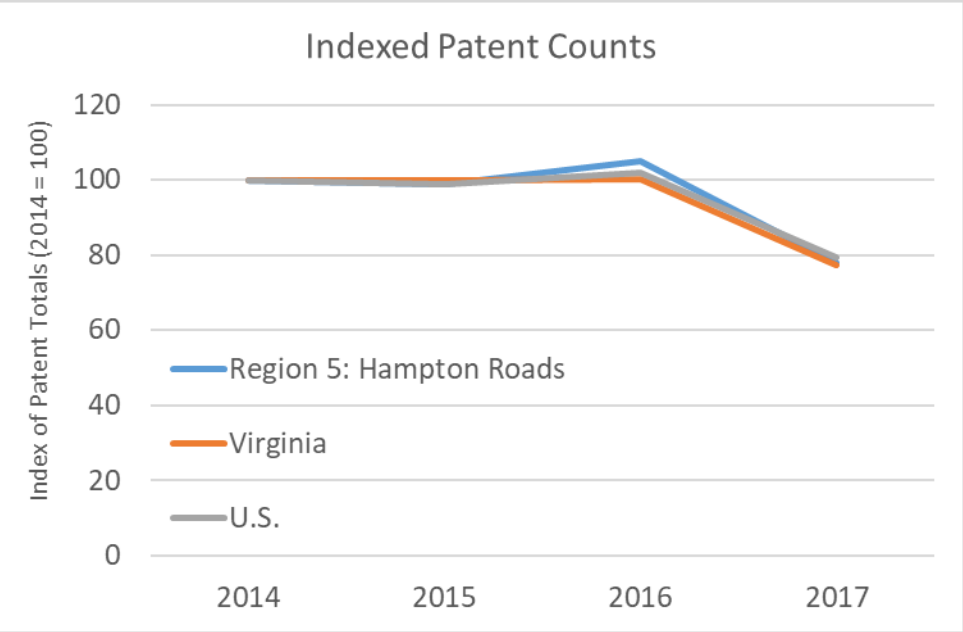

Sources: National Science Foundation (NSF) FFRDC Research and Development Survey.

Patent Activity Across Industry and Research Institutions

- When normalized, level of patenting on par with state and nation
- Interestingly, medical and surgical devices are the top areas.... but some activity also occurring in IT-related fields

Total Patents, 2014-17

Region 5: Hampton Roads	2014	2015	2016	2017
Patent Counts	412	407	433	321

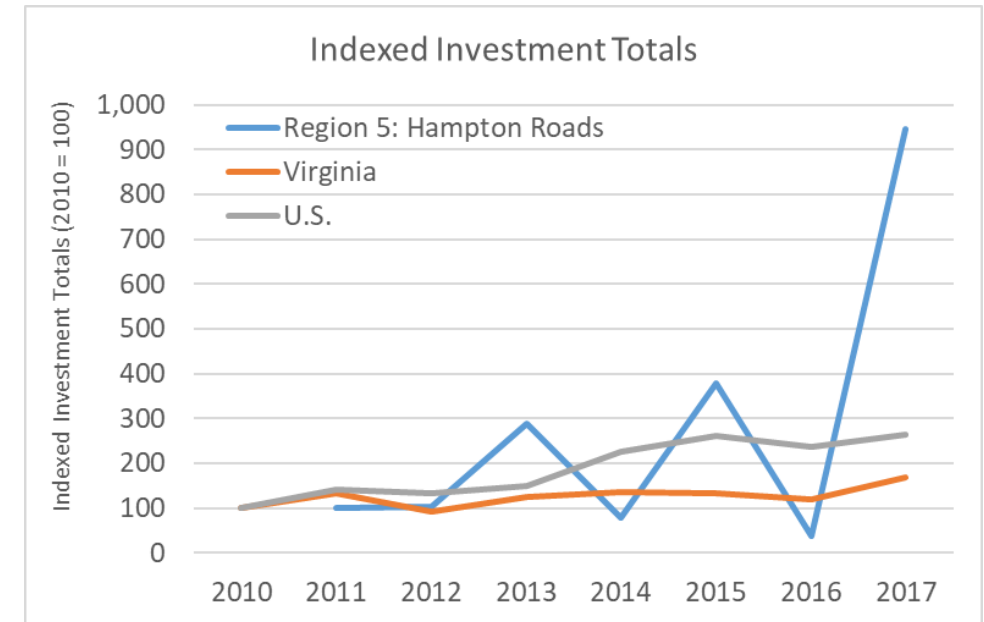

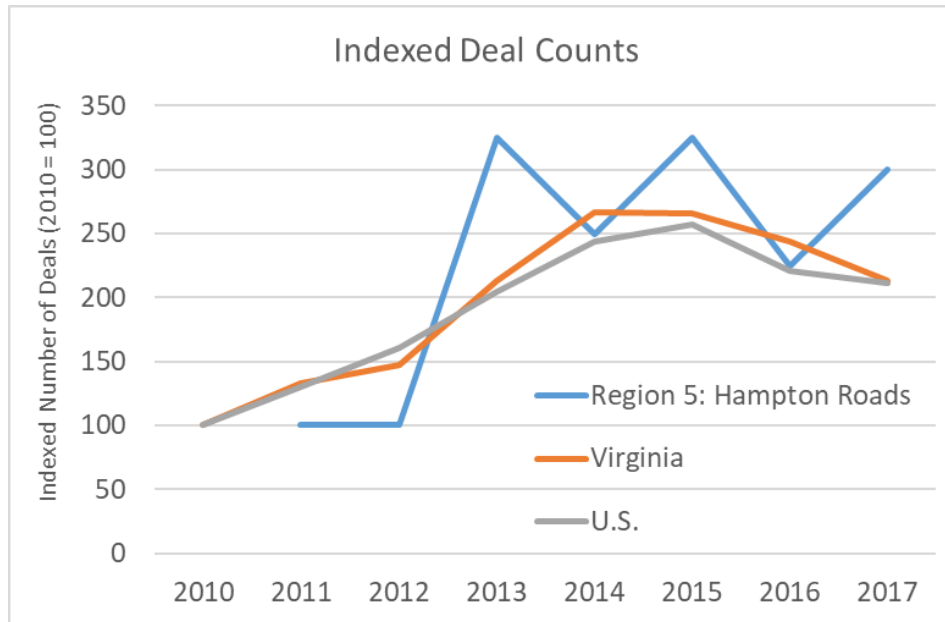

Leading Areas of Patent Activity, 2010-17

Technology Class Area	# of Patents, by inventor, 2010-2017
Diagnostic medical devices	36
Surgical devices and methods	34
Medical filters, devices providing patency to tubular structures, prostheses, and other medical accessories	32
Electronic commerce	23
Digital computing or data processing equipment or methods, specially adapted for specific functions	22
Exhaust or silencing apparatus having means for purifying or otherwise treating exhaust	21
Radiation therapy technologies	20
Network architectures or network communication protocols for network security	19
Electrotherapy technologies	17
Data processing systems specially adapted to administration and management purposes	15

Sources: Association of University Technology Managers (AUTM) Licensing Activity Survey, U.S. Patent & Trademark Office data from Thomson Reuters Thomson Innovation patent analysis database.

Venture Capital

- Number of deals increased significantly after 2012, but has remained relatively steady on a year to year basis.
- Level of funding, while somewhat volatile, has increased significantly over time.

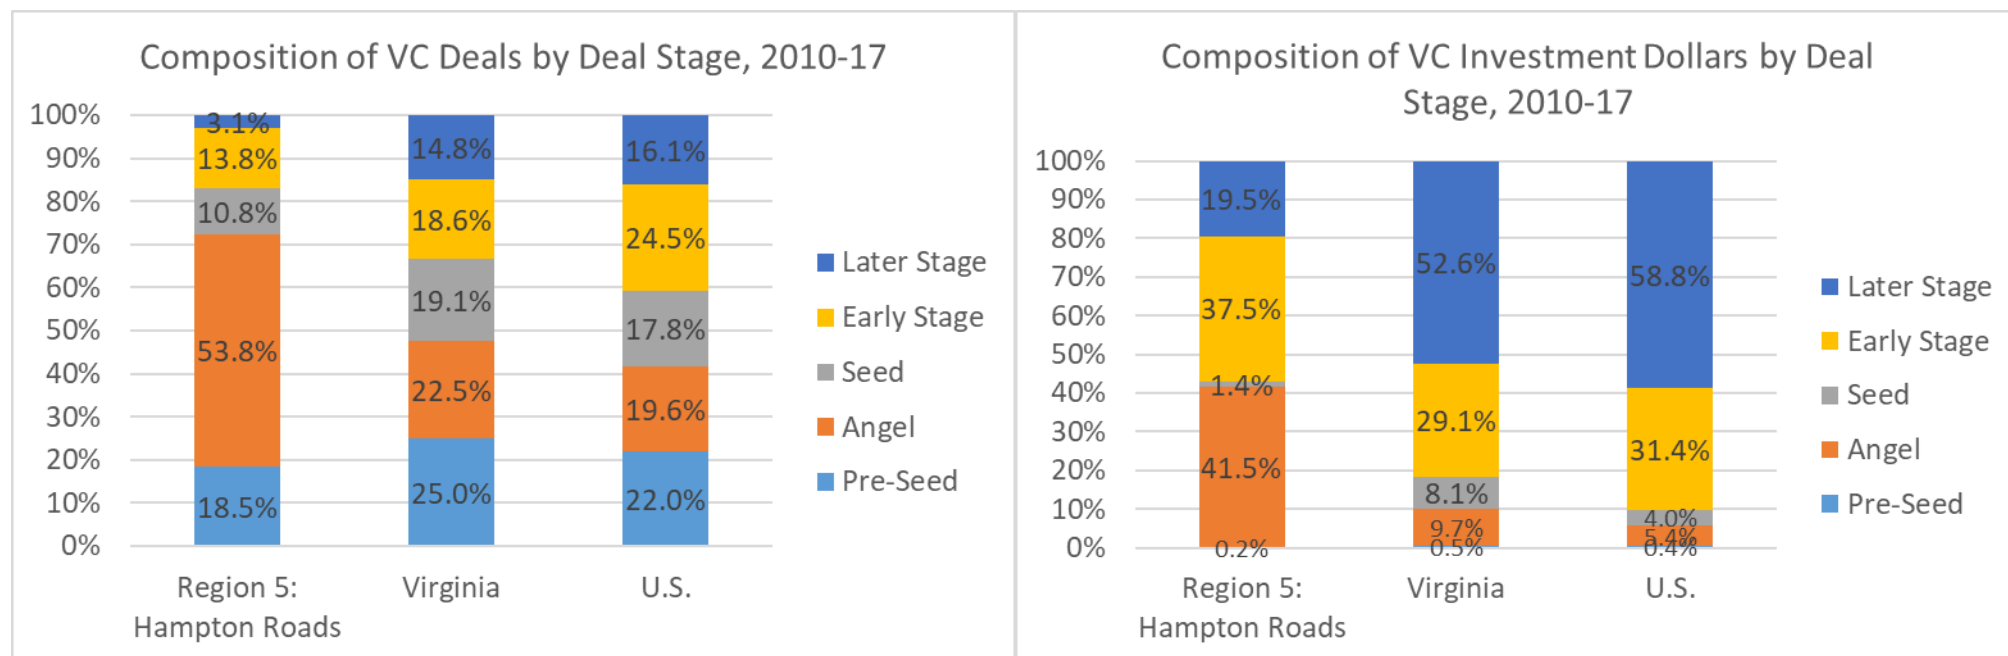

Region 5: Hampton Roads	2010	2011	2012	2013	2014	2015	2016	2017	Total
Deal Counts		4	4	13	10	13	9	12	65
Investment Totals (Millions)		\$6.0	\$6.2	\$17.2	\$4.7	\$22.6	\$2.3	\$56.6	\$115.7

Source: PitchBook Data, Inc.

Venture Capital by Stage of Funding

- Angel investment stands out in region
- Less pre-seed funding (accelerators and incubators)
- Later stages of funding significantly smaller portion of portfolio

Region 5: Hampton Roads	Pre-Seed	Angel	Seed	Early Stage	Later Stage	Total
Deal Counts	12	35	7	9	2	65
Investment Totals (Millions)	\$0.2	\$48.0	\$1.6	\$43.4	\$22.5	\$115.7

Source: PitchBook Data, Inc.

Venture Capital by Industry Clusters

- Life sciences, IT/Communication Services, and Health Care Services stand out in driving venture capital funding
- Still, many other clusters represented with deals over the period of 2010-2017

Total Venture Capital Investments by Industry Cluster, 2010-17

Region 5: Hampton Roads	Deal Count	Investment Total (Millions)	% of Total
Life Sciences	1	\$8.18	18.23%
Information Technology & Communications Services	3	\$7.30	16.27%
Health Care Services	2	\$6.84	15.24%
Life Sciences	2	\$5.57	12.41%
Manufacturing	4	\$5.07	11.30%
Business Services	1	\$4.00	8.9%
Engineering, R&D, Testing & Technical Services	1	\$3.18	7.09%
Other	1	\$2.00	4.46%
Business Services	1	\$1.61	3.59%
Ship Building, Aerospace, & Defense	3	\$1.12	2.50%

Regional Use of SBA Loans

- **SBA 7(a) loans are the agency's primary program for financial assistance to small businesses**
 - Amounts: up to \$5M
 - SBA guarantees: 75% to 85%
 - Qualification: for-profit business, SBA size standards, demonstrate good credit/mgmt./ability to repay
 - Use of Proceeds: Startup costs, buying land/buildings/equipment, new construction, working capital, seasonal lines of credit.
 - Benefits: Flexible, longer terms, lower down payments, no prepayment penalties

Region 5: SBA 7(a) Loans and Loan Amounts, Cumulative Totals 2010-18*

Industry Clusters	Co's Receiving Loans	Total No. of Loans	Total Loan Amounts (\$)	% of Total Loan Amounts
Total, All Traded Sector Industries	241	299	\$196,593,200	100%
Agriculture & Food Processing	47	67	\$116,805,100	59%
Business Services	76	90	\$27,041,500	14%
Energy, Natural Resources, & Finished Products	10	12	\$5,018,500	3%
Engineering, R&D, Testing & Technical Services	14	17	\$4,583,300	2%
Financial & Insurance Services	7	7	\$2,265,000	1%
Information Technology & Communications Services	18	19	\$5,596,000	3%
Life Sciences	4	4	\$1,565,000	1%
Manufacturing	27	35	\$9,079,700	5%
Ship Building, Aerospace, & Defense	2	2	\$2,503,000	1%
Transportation, Distribution and Logistics	36	46	\$22,136,100	11%

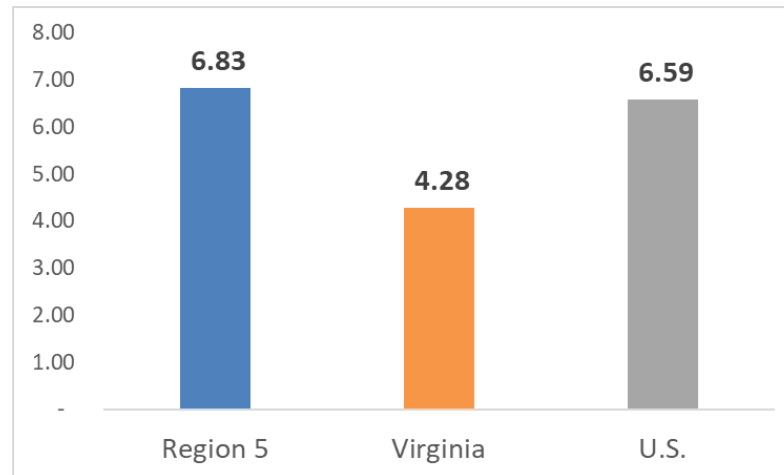

Source: TEconomy analysis of SBA loan data reports.

*Data for 2018 are through Q2.

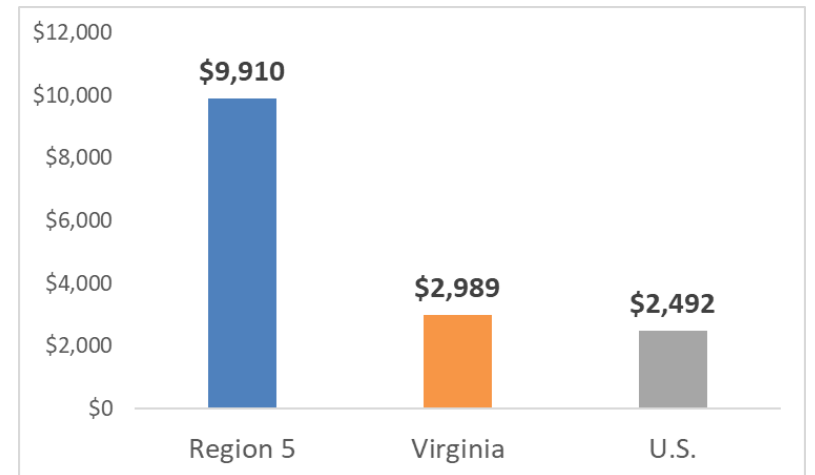

Regional Utilization of SBA Loans vs. State & U.S. Totals

- In 2017, regional companies approved for loan funding at a greater level relative to overall loan amounts compared with VA and US

SBA 7(a) Loan Counts, Traded Sector Companies Per 1,000 Establishments, 2017

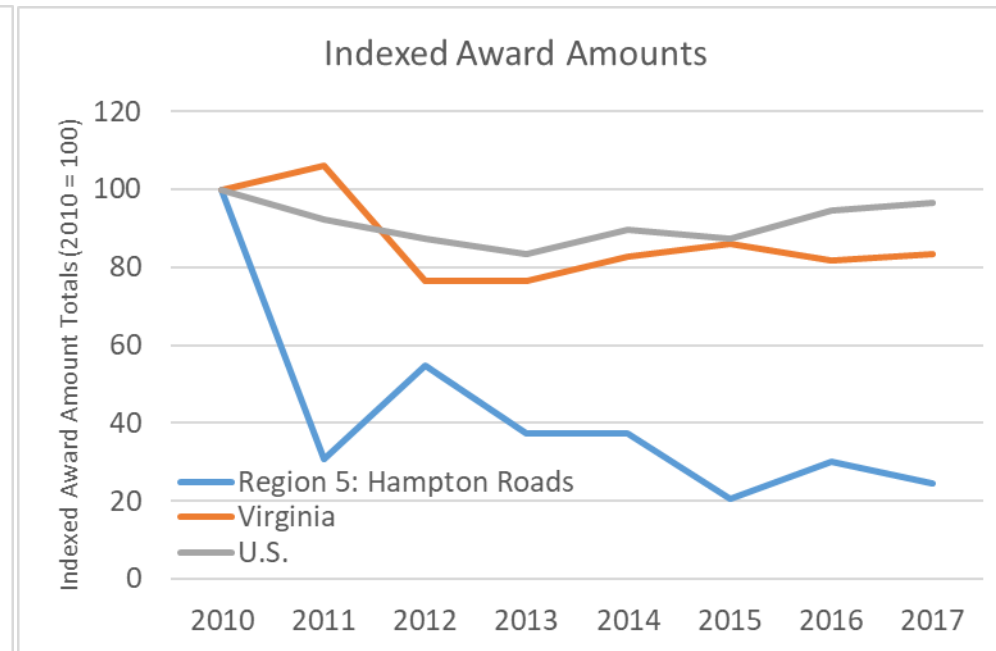

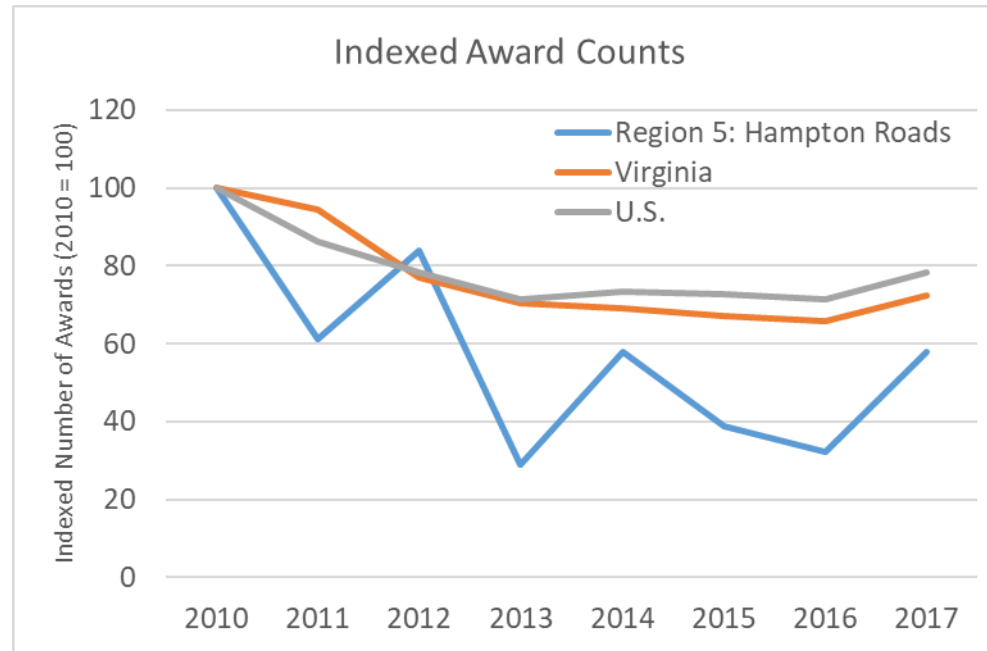

SBA 7(a) Loan Amounts (\$), Traded Sector Companies Per Establishment, 2017

SBIR/STTR Awards

- SBIR awards another important source of funding for emerging technology companies
- Region performs poorly both in number of awards as well as award amounts

Region 5: Hampton Roads	2010	2011	2012	2013	2014	2015	2016	2017	Total
Award Counts	31	19	26	9	18	12	10	18	143
Award Amounts (Millions)	\$13.26	\$4.08	\$7.25	\$4.95	\$4.96	\$2.70	\$4.01	\$3.23	\$44.44

Appendix C: Inventory and Stakeholder Discussions

Informing the “Situational Assessment”

Stakeholder Discussions and Inventory *

- Bill Cumbie, Pancopia
- Thomas Flake, BCause LLC
- Robert Crum, Hampton Roads Planning District Commission
- Jeff Conroy, Embody LLC
- Oliver Jones, Center for Applied Economics and Entrepreneurship, Hampton University
- Nancy Grden, ODU (STROME entrepreneurial center and Norfolk Innovation Center)
- Willy Donaldson, Christopher Newport University (CNU) and serial entrepreneur
- Bob Armstrong, EVMS
- Graham Henshaw, William & Mary
- Evans McMillion, 757 Accelerate
- Monique Adams, 757 Angels, 757 Seed
- Jeff Johnson, Tech Center Research Park, NASA Langley EIR
- Daniel Morris, ReaKTor accelerator (UAS)
- Paul Robinson, RISE
- Steve Sandford, Entrepreneur, LiDAR (NASA-licensed technology), Psionic
- Eric Brown, Entrepreneur, Fulfilltopia
- Dubby Wynne, ReInventHR, GoVA, VRIC
- Chris Shelton, StartWheel
- Rich Antcliff, NASA Langley Research Center
- John Lawson, WM Jordan, community thought leader
- Tim Ryan, The Launch Pad
- Drew Uvngarsky, GROW

* See handout for inventory profiles

Appendix D: Competitive Benchmarking

Benchmarking: *Regions Selected and Comparative Measures*

- **Regions Selected:** TEconomy solicited and received input across the 9 GO Virginia regions on regions they benchmark themselves against, consider useful comparisons

- **Large Technology Hubs**

- Raleigh/Durham, NC
- Austin, TX
- Charlotte, NC

- **Medium-sized regions with urban core and multiple mid-tier research institutions**

- Birmingham, AL (UAB)
- Chattanooga, TN – medium-sized, minimal university presence
- Dayton, OH (Univ. of Dayton; Wright State Univ.)
- Durham, NC (Duke)
- Greenville, SC (Clemson Univ.)
- Nashville, TN – medium-sized, major research university
- Raleigh, NC (NC State)

- **Rural regions with major research institutions**

- West Lafayette, IN (Purdue University)
- Gainesville, FL (Univ. of Florida)

- **Rural region without major research institutions (near Interstate and mfg.-oriented)**

- Greater Susquehanna, PA (MSA/Micro blend)
- Cookeville, TN (Micro) – rural, minimal university presence
- Jackson, TN (Micro) – rural, minimal university presence

- **Comparative Measures:** Organized across stages of entrepreneurial development

Ideation

- Highly educated population growth and in-migration
- New firm startup rate
- University R&D
- Patent Activity

Commercial Viability

- SBIR/STTR Activity
- University Technology Transfer & Commercialization

Market Entry

- Employment in Younger, Traded Sector Firms
- Venture Capital Activity

Growth & Scalability

- Presence of High Growth Companies
- Talent dynamics such as population growth of working age population, educational attainment and highly educated population growth and in-migrations
- SBA 7(a) loan activity

*Regional geographies are Metropolitan Statistical Areas (MSAs) if not otherwise specified above.

Ideation

Ecosystem Element	Measure	GO VA Region 5	VA	U.S.	Benchmarking Groups: Median Value

Benchmark Case Study: Austin, TX

Regional Context:	<ul style="list-style-type: none">• A major technology hub with one research anchor that until recently was not aggressive on tech transfer/startups and had no medical school• Chamber of Commerce drove progress where government was passive or lagged• Success at attracting semiconductor consortia in 1980s led to increasing ties to Silicon Valley and its investors• Unexpected success of Dell Computer in 1980s/1990s created local wealth and management talent, all used in startup formation
Key Tools:	<ul style="list-style-type: none">• IC2. Institute started creating entrepreneurial momentum even in a period when university itself lagged• Austin Technology Incubator. Probably the most important outcome of IC2. Industry verticals aligned with Chamber targets.• Dell Medical School. Chamber succeeded in lobbying state for new med school at UT Austin, and Travis County matched with local tax levy• Innovation District. Next logical step after medical school is an integrated medical district, now under way• SXSW. Once a music festival, it deliberately broadened to add film and software/interactive, creating additional ties to coastal media & investors• Kelleher Center at UT McCombs School. Finally active in entrepreneurship, UT Austin now has a campus hub in the business school• Cockrell School of Engineering Innovation Center offers advice and training to faculty and staff, provides small startup grants, and hosts competitions, among other activities.
Successes:	<ul style="list-style-type: none">• Chamber has adopted Innovate Austin initiative, and names annual 'A-list' of emerging, growth, and accelerator-stage ventures• Regional Council of Governments CEDS has unusually sophisticated section on entrepreneurship and growth acceleration, recognizing importance of both launch and expansion• ATI itself claims to have helped clients raise \$890 million in capital, cumulatively, \$200 million in 2016 alone to 19 companies• Across entire region, Chamber claims \$869 million in capital to 123 deals in 2016
Challenges:	<ul style="list-style-type: none">• Growing a full, research-oriented biomedical capacity has only just begun and remains a major challenge• Withering of semiconductor initiatives leaves status of J.J. Pickle Research Campus uncertain, isolated by expressway from main campus
Best Practice Lessons:	<ul style="list-style-type: none">• Austin is the pre-eminent example of successfully mixing arts and technology into a single message on creative economy• SXSW has been as impactful as any high-tech initiative, and made Austin a platform for startups nationally, as well as exposing local startups to the national audience• There are few other mid-sized metros with such close ties to the centers of music and film (LA) and tech (NY and San Francisco)

Benchmark Case Study: Birmingham, AL

Regional Context:	<ul style="list-style-type: none">• Mid-sized region with research anchors, including University of Alabama Birmingham (\$500+ m annually) and Southern Research Institute (~\$70 m annually in contract research funding).• Research anchor focus is strongly on life sciences.• Challenge of having to reinvent itself from being a steel-oriented economy (the “Pittsburgh of the South”) to an innovation and knowledge hub.
Key Tools:	<ul style="list-style-type: none">• Applied and translational research focus: Alabama Drug Discovery Alliance, a collaboration of SR and UAB, leverages significant drug discovery and development research and shared use facilities and moves new therapeutic leads through a structured process of assay development, high-throughput drug screening, lead identification and development, pre-clinical testing and early clinical trials.• Innovation Depot, a 140,000 sq. ft. incubator and co-location space, making it one of the largest in the nation. It offers range of space options, including wet lab. The Innovation Depot is far more than a technology incubator, but a home for a variety of entrepreneurial and talent initiatives in collaboration with community stakeholders.• Velocity, a relatively new accelerator housed at Innovation Depot, with ability to invest \$50,000 in seed funding for each selected startup company.• IT workforce development – Multiple efforts in place at different levels for IT coding/software development bootcamps targeting undergraduates and under-employed/unemployed young adults.• Networking activities: Tech Birmingham programs include a monthly TechTuesday speaker series, member only networking socials, broader information sharing events, and Keep It Local to create opportunities for local companies to do more business together in IT products and services, among other efforts.
Successes:	<ul style="list-style-type: none">• Innovation Depot reports 112 companies assisted with 1,064 jobs and \$155 million in sales revenue. Largely tech-oriented companies, but some life sciences.• Establishing networks and connections with other communities to generate investor interest and entrepreneurial teams, including New York and Israel• Many of its graduates are now serving as tenants for a larger innovation district development in Birmingham• Alabama Drug Discovery Alliance in early 2018 had 19 drugs in the development pipeline, leveraging major drug discovery programs in emerging infectious diseases, cystic fibrosis and cancer, engaging major biopharmaceutical companies.
Challenges:	<ul style="list-style-type: none">• Advancing broader access to capital across stages of investment• Generating life sciences startups from research anchors
Best Practice Lessons:	<ul style="list-style-type: none">• Role of entrepreneurial anchor in creating focus and branding on innovation and entrepreneurship• Advancing a single umbrella for delivery of technology transfer, commercialization and entrepreneurial services• Embedding talent and workforce initiatives with innovation and entrepreneurial anchor activities

Benchmark Case Study: Charlotte, NC

Regional Context:	<ul style="list-style-type: none">• Fast growing technology hub with smaller research anchors• Leveraging position in banking center to generate a rising entrepreneurial community.
Key Tools:	<ul style="list-style-type: none">• Innovate Charlotte (formerly Charlotte Regional Fund for Entrepreneurship): Established through the 2012 regional plan for “Prosperity for Greater Charlotte,” and funded through the region’s \$2.5 billion community foundation. It was envisioned as a grant funding mechanism to support local non-profits to advance entrepreneurial culture, ecosystem connections, risk capital availability and technical skills. Over the years has taken a more pro-active approach in providing entrepreneurial assessments of the region, holding ideation workshops and recommending specific activities.• Packard Place: A redeveloped large auto showroom/building that has been transformed into an entrepreneurial hub housing multiple accelerators (see below) as well as offering fellowships to new startup founders and co-working space.• Network of accelerators: Includes one in clean energy (Joules Accelerator), fintech (QC FinTech), and tech (RevTech Labs and NC IDEA)• Ventureprise: UNC Charlotte’s long-time affiliated incubator founded back in 1986. Long history of engaging entrepreneurial community, though in 2017 reconstituted with a stronger focus on student and faculty startups, with programs such as Ventureprise Launch NSF iCorps for university tech commercialization and 49er Foundry a student incubator. Also manages the NC IDEA offering a lean-startup program similar to its Ventureprise Launch for innovation-driven startups in the community.
Successes:	<ul style="list-style-type: none">• Packard Place reports results for its aggregate community of accelerators, coworking spaces, fellows, etc. as generating from 2010-2017, 500 new jobs and \$1 billion in venture capital raised.• Ventureprise reports over the 2008-2017 period supporting 46 new clients, with some notable successes such as CSi/Photograds, Verian Technologies, SecureEdge Networks and Saprex, which had successful exits or have moved into their own commercial facilities to accommodate substantial growth.
Challenges:	<ul style="list-style-type: none">• Long time period to grow university research anchors to match fast growth of overall entrepreneurial activities and offer a deeper driver of innovation.• Not doing well in growing new research park anchors to complement emergence of technology hub, including slow growth of campuses with Charlotte Research Institute and David H. Murdock Research Institute.
Best Practice Lessons:	<ul style="list-style-type: none">• Role of community foundation and community leaders in spurring entrepreneurial development.

Benchmark Case Study: Chattanooga, TN

Regional Context:	<ul style="list-style-type: none">• Mid-sized region with limited research anchor.
Key Tools:	<ul style="list-style-type: none">• Company Lab (or CO.LAB) is a non-profit accelerator and one-stop shop for local entrepreneurs founded in 2008. CO.LAB has developed a range of programs and services for both local growth and high-growth companies at different stages of development, including: Way Finding to screen and guide entrepreneurs to services, CO.STARTERS a 9-week program that teaches lean startup methods for business startup; CO.LAB Accelerator, a mentor-driven program for high-growth potential startups; GIG Tank, an accelerator focused on ultra-high bandwidth business applications; Consumer Goods Accelerator, an accelerator focused on outdoor recreation and food/beverage sector.• CO.LAB connects companies to capital, like the Chattanooga Renaissance Fund, and Lamp Post Group focused on seed investments. CO.LAB has also joined the Kiva, crowd-sourced financing platform.• In 2015 a new intermediary organization formed, the Enterprise Center, to more broadly leverage the City's high broadband infrastructure to create a place that develops and tests many applications for urban needs.• Chattanooga foundations and business leaders have historically invested in downtown revitalization efforts, including the riverfront development. CO.LAB spun out of downtown revitalization and visioning exercise supported by local family foundations. Other investments and assets include Chattanooga's gigabit network (10 gbps metro-wide fiber optic network), UTC, the regional university in close proximity to downtown, and the rebranded Innovation District involved mixed use developments.
Successes:	<ul style="list-style-type: none">• Significant scale of activities by CO.LAB since its formation back in 2008, including 20+ cohorts and 700+ participants in CO.Starters, 83 companies graduated and \$7M+ capital raised from CO.LAB Accelerator, 58 companies graduated and \$29M+ capital raised for GIG Tank and 200 consultations a year from Way Finding.
Challenges:	<ul style="list-style-type: none">• Lack of capital is viewed as a key constraint to high-growth companies
Best Practice Lessons:	<ul style="list-style-type: none">• Demonstration of how to revitalize a community and its downtown through talent retention, placemaking, startup activity, and ecosystem building that supports both "local growth" and high-growth companies• Critical role of local foundations in catalyzing activities and combining placemaking, unique tech infrastructure development and entrepreneurial programming.

Benchmark Case Study: Dayton, OH

Regional Context:	<ul style="list-style-type: none">• Mid-sized region anchored by major federal research lab, Air Force Research Labs at Wright Patterson Air Force Base, and University of Dayton with its research institute generating more than \$100m in research activities highly aligned with ARL needs, plus Wright State University, with some research programs and an important talent driver for the region.• Challenge of moving beyond federal contract activity to drive new traded sector company growth.
Key Tools:	<ul style="list-style-type: none">• Wright Brothers Institute (WBI): A partnership intermediary to facilitate technology transfer from ARL, identify unmet technology needs, further commercialization through collaborative team efforts and engage small technology-based businesses to tap opportunities and partnerships.• The Entrepreneur Center (TEC): Serves as the delivery arm of entrepreneurial services supported by the Ohio Third Frontier and operates a traditional incubator with two sites in the region, which is now expanding into offering coworking space and an accelerator program. Also houses a site for WBI.
Successes:	<ul style="list-style-type: none">• Wright Brothers Institute reports supporting over 100 innovation-based projects annually, with typically \$3 million of commercialization activities and engaging over 1,000 small technology-oriented businesses.• While not among the top performing seed funds in Ohio, the Accelerant seed fund over 2007-2014 invested \$17 million, creating 2,995 jobs and retaining 1,274 jobs. This performance though ranks last of the six privately-managed regional seed funds supported with matching funding from Ohio Third Frontier – and since 2013 has received no additional state matching funds.
Challenges:	<ul style="list-style-type: none">• Creating more commercially focused technology-based companies.
Best Practice Lessons:	<ul style="list-style-type: none">• While advancing industry partnerships with federal labs can be effective, it does not always translate into new commercially-focused technology businesses.

Benchmark Case Study: Gainesville, FL

Regional Context:	<ul style="list-style-type: none">• Compact metro in North Central Florida surrounded by rural counties, distant from major population centers, dominated by U Florida, the land grant which also includes a medical school• Master planning is emphasizing infill between historic downtown and the university campus• Innovation & economic development one of six “pillars” of regional CEDS
Key Tools:	<ul style="list-style-type: none">• Sid Martin Biotech. 40,000 s.f. Incubator created in 1990 with long and well recognized track record, off campus in Progress Corporate Park• Florida Innovation Hub. 100,000 s.f. dry incubator at downtown campus, anchoring:• Innovation Square. Major live/work innovation district project planned for blocks between campus and downtown Gainesville, 1 major multitenant building already open, both wet and dry space• Entrepreneurship and Innovation Center. On-campus hub for student entrepreneurship, including consultancy with real startups and ‘hatchery’ for student ventures• Florida Opportunity Fund. Venture fund established with state’s allocation from Treasury SSBCI fund• Florida Virtual Entrepreneur Center. State-supported through Florida High Tech Corridor collaboration of the three major research universities.• StartupGNV (formerly GAIN). Not-for-profit organization encouraging local startups.• Additional lower-tech incubators including two at smaller institutions like Santa Fe College strongly supported by the Chamber and highlighted in regional strategies• Multiple commercial coworks, makerspaces, etc.• Florida Angel NEXUS. Statewide collaborative of regional angel groups and funds• Every county in the region (all 12 counties surrounding Alachua) qualify for planning support from the state Rural Economic Development Initiative
Successes:	<ul style="list-style-type: none">• Sid Martin claims its companies have attracted cumulatively \$500 million in capital (\$1.7 billion in funding including revenue and acquisitions), with 80% still in operation 5 years after graduation, and 16 of all biotech companies in-state started there• UF licensing office claims to have started more than 160 companies (about half biomedical, but also technology)
Challenges:	<ul style="list-style-type: none">• Relative isolation from state’s major business/corporate centers – 70 miles to Jacksonville, 110 to Orlando, 130 to Tampa• Chamber recognizes need to take strategy to a higher level, including better connecting startup creation to targeted industry clusters, and reducing outward brain drain
Best Practice Lessons:	<ul style="list-style-type: none">• Through patient nearly 30-year investment in Sid Martin Biotech, UF has moved beyond “Gatorade” to genuine standing in biotech world

Benchmark Case Study: Greenville, SC

Regional Context:	<ul style="list-style-type: none">• Mid-sized region anchored by presence of university research anchors in the region and a growing academic hospital creating a new medical school in collaboration with local universities.
Key Tools:	<ul style="list-style-type: none">• New innovation center campuses outside of the main Clemson University campus with focus on specific technologies, including:<ul style="list-style-type: none">• Clemson University International Center for Automotive Research (CU-ICAR), Greenville: Significant public-private partnership between growing automotive industry, Clemson University and the state to create a new R&D center of excellence in automotive technologies close to the industry cluster and about 45 minutes from the Clemson campus . Includes creation of a new graduate program in automotive technologies at the site that involves multi-disciplinary approach involving electronics, computing and advanced materials, supported by recruitment of eminent scholars. Home to company research centers, including BMW IT Research Center and Koyo Bearing R&D Center, plus offers a 60,000 sq ft Center for Emerging Technologies.• Clemson University Biomedical Engineering Innovation Campus, Greenville: A 30,000 sq. ft. lab located within a facility at the Greenville Health System campus, which is a spearhead to advance collaborations with a new academic medical center development taking place.• Clemson University Innovation Campus and Technology Park, Anderson, SC: Eight miles from the main Clemson campus. Home to university's Advanced Materials Research Lab, environmental labs and computing center; Duke Energy Innovation Center; and industry funded National Brick Research Center• Rise of mix of accelerator, incubator and maker-spaces in Greenville region: Led by the NEXT program of the Greenville Chamber, brings a strong focus on entrepreneurial and innovation-focused small businesses, with three different facilities, including one targeted for advanced manufacturing, mentoring programs, events and other ecosystem development efforts.
Successes:	<ul style="list-style-type: none">• \$250 million public-private partnerships in CU-ICAR has generated 770 jobs and another 720 jobs announced, plus major surrounding projects including 1,100-acre mixed use development with an expected population of 10,000, location of Hubbell Lighting Corporation headquarters, among other industry and health system investments.• NEXT Innovation Center reports assisting 102 companies, attracting \$23 million in new capital in 2017 and 261 new jobs paying on average \$69,443.
Challenges:	<ul style="list-style-type: none">• Linking major public-private innovation center developments with entrepreneurial activity.
Best Practice Lessons:	<ul style="list-style-type: none">• Creating new anchor research and innovation centers around industry clusters through university, industry and state partnerships

Benchmark Case Study: Nashville, TN

Regional Context:	<ul style="list-style-type: none">• Mid-sized region anchored by a major research university, strong music scene and leading healthcare companies
Key Tools:	<ul style="list-style-type: none">• The Nashville Entrepreneur Center a non-profit offering a range of fee-based services and memberships spanning coworking, networking, incubation and intensive mentoring/acceleration services:<ul style="list-style-type: none">• Co-Working space and Community access• Pre-Flight program for entrepreneurs to advance business ideas• In-Flight program for early-stage startups with up to three employees and \$150,000 in revenue• Accelerators focused on music industry and healthcare industry verticals that accept startups nationwide• Vanderbilt is an NSF i-Corps site and has graduated 17 teams; Vanderbilt's Wond'ry, the university innovation center, is aimed at developing an institutional innovation culture for faculty and students, and includes programs like Innovation Garage (industry-university collaboration on disruptive solutions), entrepreneurship courses, a makerspace, pitch events, and EIRs• Bunker Labs
Successes:	<ul style="list-style-type: none">• Branding from major LaunchTN entrepreneurial event, 36/86, is helping to create buzz for Nashville's entrepreneurial community, which is not strong in VC funding, overall net employment from young companies nor university tech transfer, but is attracting significant net in-migration and is generating significant numbers of high growth companies.
Challenges:	<ul style="list-style-type: none">• Very diffuse entrepreneurial community, with need to create stronger presence of innovation in the region, including more placemaking
Best Practice Lessons:	<ul style="list-style-type: none">• Importance of having a one-stop entity for entrepreneurship

Benchmark Case Study: Raleigh-Durham, NC

Regional Context:	<ul style="list-style-type: none">• Mid-sized region anchored by major research universities with strong focus on innovation programs and place-making.
Key Tools:	<ul style="list-style-type: none">• NCBiotech Center: Long-standing, dedicated program to growing life sciences in the region and across the state, including advancing research excellence, investing directly in emerging companies, ensuring trained workforce and advancing networking and peer groups in life sciences.• Major placemaking for technology with Research Triangle Park (RTP) and Centennial Campus at NC State. RTP is one of the oldest and largest research parks in the U.S., but has been largely home to larger corporations, including a strong emphasis on biopharmaceutical. It is now reinventing itself with a new town center to offer more amenities and opportunities for emerging companies, plus single use facilities are being converted into multitenant facilities for start-ups and emerging companies, such as Alexandria Real Estate's new Agtech facility that used to be a Syngenta R&D facility.. Centennial Campus at NC State has been a leader on establishing innovation districts, leveraging the university as an anchor and creating close relationships between faculty, students and company tenants, while offering mixed use developments including housing.• Role of universities in commercialization.<ul style="list-style-type: none">• NC State is a national leader, with over 20 startups annually, dedicated funding through its Chancellor's Innovation Fund for proof-of-concept, a full-time site for NSF i-Corps, an Executive in Residence program to scout for technologies at university research labs, bootcamps and business plan competitions, strong entrepreneurial programs within its colleges and strong alumni networking of its start-ups (Wolfpack Investor Network).• UNC in 2010 launched a stronger focus on commercialization and entrepreneurship, including commercialization training launched through an EDA i6 grant, on-campus incubators, a downtown coworking space, proof-of-concept funding (Kickstart Venture Services), alumni investor network (Carolina Angel Network) and a \$10 million seed-stage investment fund created by the university's endowment known as Carolina Research Ventures Fund.• Duke University has also embraced entrepreneurship with fellowship program, startup challenge, an incubation fund and a prototyping facility for students, and in its technology transfer efforts participation in the Coulter program, active alumni angel network and partnerships with private sector incubators and accelerators (MedBlue incubator, Biomarker Factory and Center for Advanced Hindsight).• Non-university physical developments, including coworking and incubator spaces, such as HQ coworking with three facilities in Raleigh and American Underground and BioLabs in Durham
Successes:	<ul style="list-style-type: none">• Raleigh Durham is a top region for venture investment in high-potential innovation-driven companies, with over \$1 billion in venture funding to 173 companies, able to attract VC investment from East and West coasts, as well as having a strong base of SBIR backed companies.
Challenges:	<ul style="list-style-type: none">• Linking major public-private innovation center developments with entrepreneurial activity.
Best Practice Lessons:	<ul style="list-style-type: none">• University engagement in commercialization and innovation is key driver for the region. Builds on brand of being a major complex for university research and talent.

Benchmark Case Study: Susquehanna, PA

Regional Context:	<ul style="list-style-type: none">• Rural region with no university research anchors, but presence of non-research oriented colleges and universities.
Key Tools:	<ul style="list-style-type: none">• Presence of a Keystone Innovation Zone designation, one of 29 in the state, offering transferable tax-credits of up to \$100,000 based on growth in revenues to young companies under 8 years old, operating in innovation-led sectors and located in designated areas near colleges and universities.• Rural Business Innovation serves as hub for entrepreneurship including:<ul style="list-style-type: none">• Network of incubators located near local colleges and universities• Business technical assistance for accessing financing• Micro-startup grants of up to \$5,000• Student internships of up to \$2,000 per semester• Coordinator of local KIZ involving outreach and engagement with local businesses
Successes:	<ul style="list-style-type: none">• Diversified range of approximately 30 companies served across manufacturing, IT, and bio-health through incubators, internships, micro-loans and KIZ tax benefits• Eleven companies received KIZ benefits in 2017 generating nearly \$1 million in new sales and receiving \$444,000 in transferable tax credits.
Challenges:	<ul style="list-style-type: none">• Sustaining a rural economy by having new and small businesses generate job opportunities
Best Practice Lessons:	<ul style="list-style-type: none">• Demonstrates role that an entrepreneurial focused entity can have across a rural region partnering with local institutions• Shows that a targeted tax credit oriented towards young growing businesses in traded industry sectors can be effective in rural communities.

Benchmark Case Study: West Lafayette, IN

Regional Context:	<ul style="list-style-type: none">• Rural region with major research anchor
Key Tools:	<ul style="list-style-type: none">• Purdue's university driven research park developments. The Purdue Research Park, a 725-acre site on formerly university ag-related lands approximately 8.5 miles from main campus. Now home to 160 tenants. Home to a 105,000 sq. ft. university incubator and coworking space, which was developed with private contributions and bond funding from a state tax-increment financing program to create business incubators that offers \$5 million in bonding per incubator. Discovery Park District, a 400-acre mixed-use development immediately west of the main campus. It is the location for many of the university's commercialization and entrepreneurial development initiatives housed in the Burton Morgan Center for Entrepreneurship.• Purdue's Foundry is an accelerator-type program to help Purdue-affiliated entrepreneurs create startups offering access to EIR mentors as well as an umbrella for a range of entrepreneurial and commercialization initiatives including: Trask Fund for applied research and proof-of-concept funding of university inventions; an NSF iCorp site; a range of venture financing assistance, including a \$12 m Foundry Investment Fund, a pre-seed Elevate Purdue Foundry fund receiving state support, Purdue Startup Fund, Purdue Angels and pre-seed Ag-Celerator funding.
Successes:	Since the founding of the Purdue Foundry in 2013, there have been 165 startups created that generated more than \$270 million in funding and 200-plus new jobs.
Challenges:	<ul style="list-style-type: none">• Growing a broader and sustainable innovation ecosystem for the region that sees local startups stay rooted in the region as well as attract other growth-oriented companies.
Best Practice Lessons:	<ul style="list-style-type: none">• A major research anchor can both attract existing industry operations to locate nearby as well as create the tools to generate new startups from research inventions, and faculty and student ideas.

Innovating Tomorrow's Economic Landscape

TEConomy Partners is a global leader in research, analysis and strategy for innovation-based economic development. Today we're helping nations, states, regions, universities, and industries blueprint their future and translate knowledge into prosperity.
