RE: 2019 Virginia Telecommunication Initiative Grant Modification

Tammy,

This letter is to support the modification of our recently awarded 2019 grant from DHCD. We have included a newly revised map of the grant area showing we have moved our coverage out of the CAFII area. The map also depicts that we will only have backbone fiber in the CAFII area to enable us to connect to our existing core network. We have also included the original map for comparison.

This shift out of the CAFII area allows us to potentially pick up 107 additional customers. This increase in potential customers will increase customer premise cost by \$156,128.43 which iGo Technology, Inc. will absorb as necessary.

Please call us with any questions.

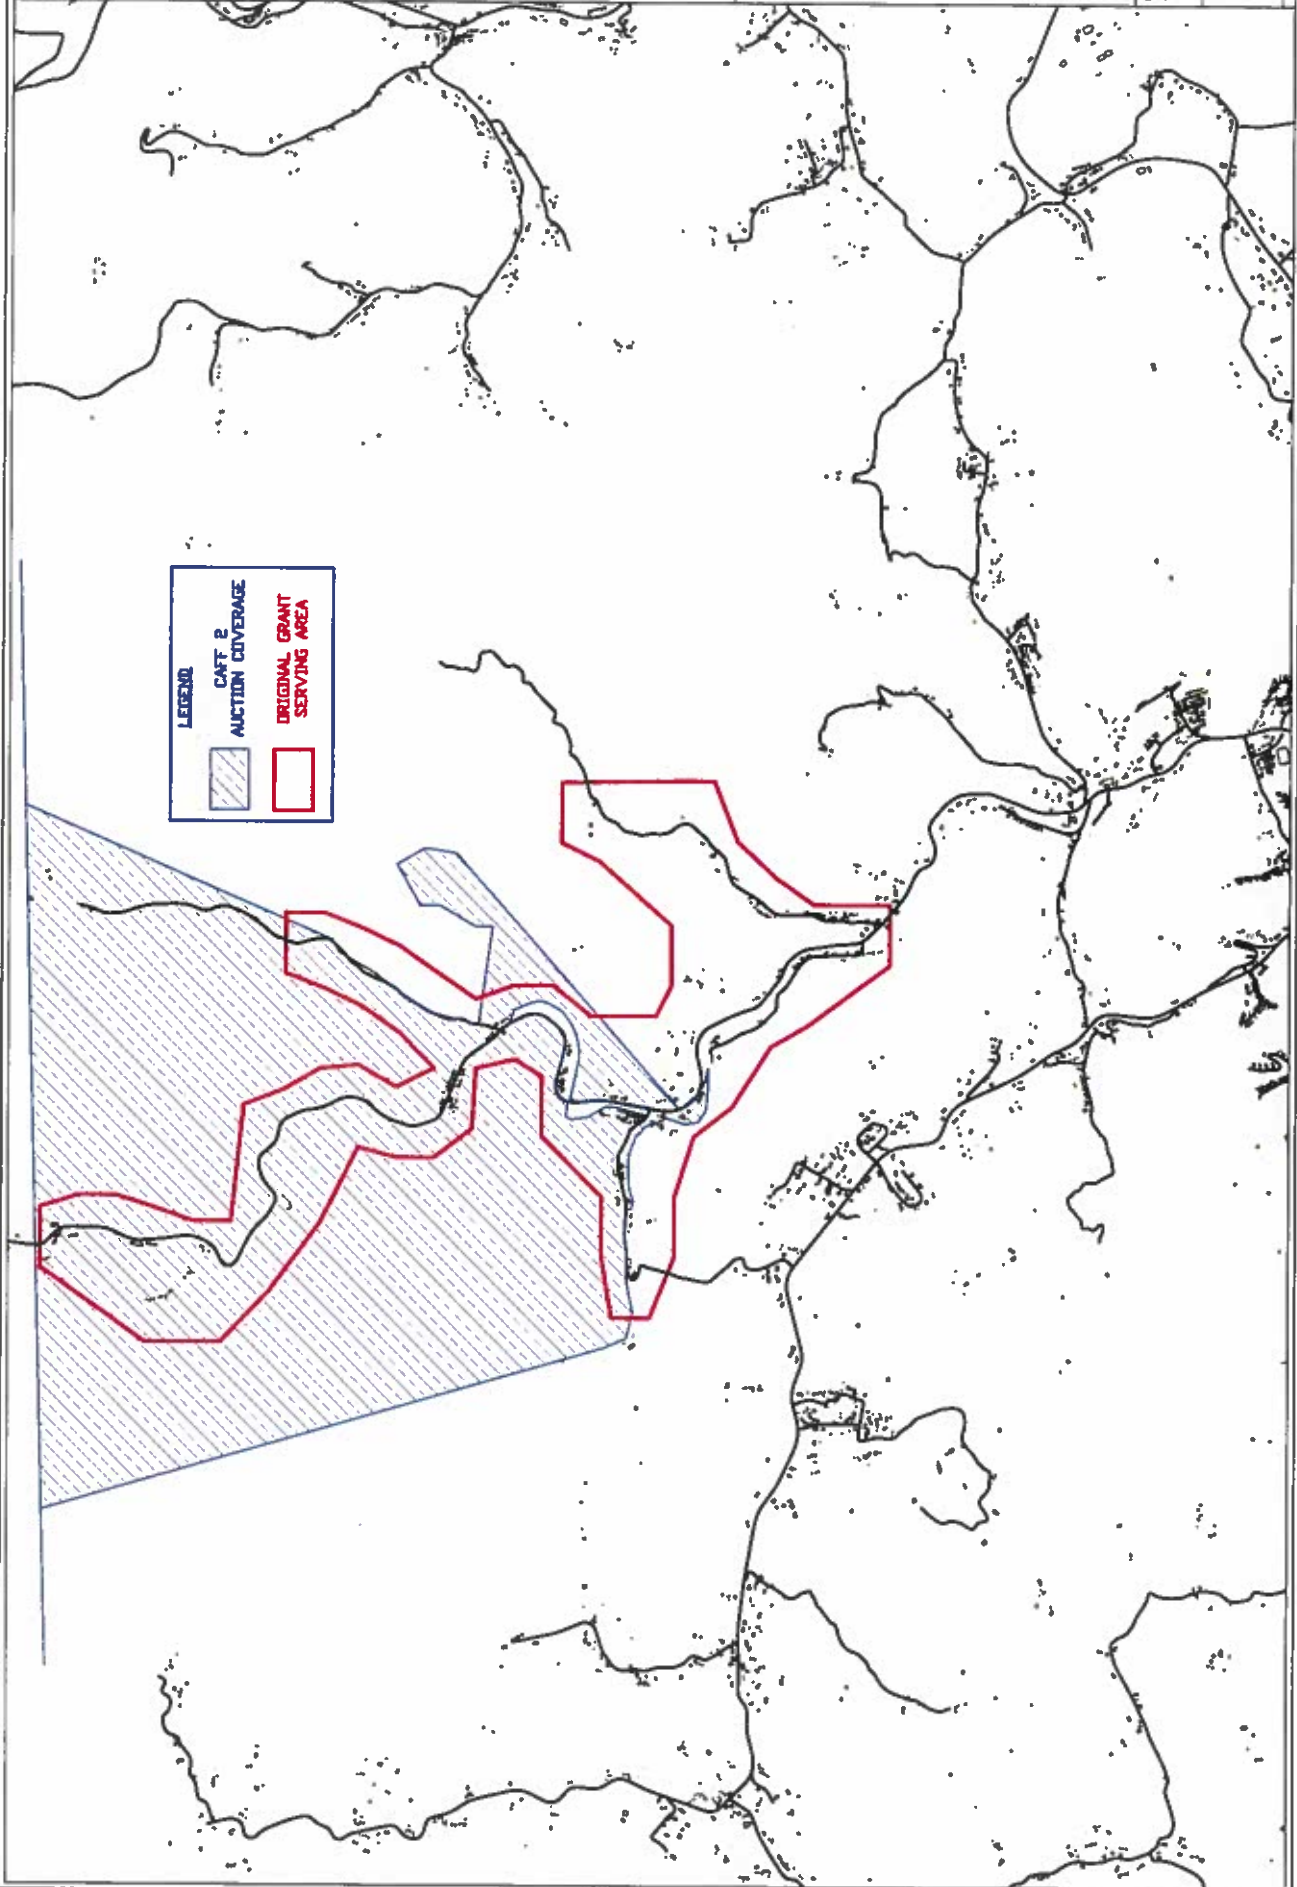

Sincerely,

Ernest McFaddin  
Chairman
